Le Corbusier Redrawn The Houses Book:

Le Corbusier Redrawn Steven Park, 2012-11-07 Le Corbusier 1887 1965 was the most significant architect of the twentieth century Every architecture student examines the Swiss master's work Yet all too frequently they rely on reproductions of faded drawings of uneven size and quality Le Corbusier Redrawn presents the only collection of consistently rendered original drawings at 1/200 scale of all twenty six of Le Corbusier's residential works Using the original drawings from the Le Corbusier Foundation's digital archives architect Steven Park has beautifully redrawn 130 perspectival sections as well as plans sections and elevations of exterior forms and interior spaces These remarkable new drawings which combine the conceptual clarity of the section with the spatial qualities of the perspective not only provide information about the buildings they also help students experience specific works spatially as they learn to critically examine Le Corbusier's works

The Fractal Dimension of Architecture Michael J. Ostwald, Josephine Vaughan, 2016-09-01 Fractal analysis is a method for measuring analysing and comparing the formal or geometric properties of complex objects In this book it is used to investigate eighty five buildings that have been designed by some of the twentieth century's most respected and celebrated architects Including designs by Le Corbusier Eileen Gray Frank Lloyd Wright Robert Venturi Frank Gehry Peter Eisenman Richard Meier and Kazuyo Sejima amongst others this book uses mathematics to analyse arguments and theories about some of the world's most famous designs Starting with 625 reconstructed architectural plans and elevations and including more than 200 specially prepared views of famous buildings this book presents the results of the largest mathematical study ever undertaken into architectural design and the largest single application of fractal analysis presented in any field The data derived from this study is used to test three overarching hypotheses about social stylistic and personal trends in design along with five celebrated arguments about twentieth century architecture Through this process the book offers a unique mathematical insight into the history and theory of design
