The presentation of the features is scenario-oriented; i.e., most of the features are demonstrated in terms of small business scenarios. The resource contains the scenario descriptions, screen shots, detailed screen cams, and ABAP program source to enable the reader to create all objects related to the scenario and run/execute them. The underlying concepts of a feature command are conveyed through execution of these hands-on programs. Further exercises to be performed independently by the reader are also proposed. The demonstration/illustration objects, including the programs, rely on some of the SAP application tables being populated, for example, an IDES system, which is now a de facto system for all SAP training-related activities.
