Institutions, Entrepreneurship, and Economic Performance David Urbano, Sebastian Aparicio, David B. Audretsch, 2019-04-11 Using institutional economics as a theoretical framework this book analyzes institutional environment conducive to entrepreneurial activity in order to enhance economic performance across countries In particular the main contributions of this book to the entrepreneurship literature are the following Identify past and current research about the institutional context shaping entrepreneurial activity and its effect on economic growth Examine social progress orientation as those institutional factors that are shaping innovative entrepreneurial activity Explore the effect of different types of entrepreneurial activities on economic growth Examine how social progress orientation through opportunity driven entrepreneurship affects economic development Analyze the interrelationships between institutions entrepreneurial activity and economic development across countries Study how the country s institutional context influences the way in which entrepreneurial activity affects social progress Two sides of the same coin might be observed when analyzing policy aspects of those institutions affecting entrepreneurial activity On the one hand effective public policy to promote entrepreneurship is predicated on understanding the underlying forces as well as the consequences and impacts of entrepreneurship On the other hand different endeavors to promote entrepreneurial activity might have deleterious economic effects since they could

actually reduce employment in the long term Thus it is crucial to understand the institutional environment in which entrepreneurs are interacting and making decisions The comprehension of these phenomena serves to move forward the theoretical practical and policy debate on entrepreneurship as a mechanism to achieve higher economic performance

Youth Entrepreneurship and Local Development in Central and Eastern Europe Bruno

Dallago, 2017-11-30 This book analyses the opportunities and barriers for youth entrepreneurship amid systemic change in Central and Eastern Europe The authors cover different aspects of youth entrepreneurship and its contribution to the debate on youth unemployment in transition economies The book discusses the wide spread over optimism regarding youth entrepreneurship self employment and its impact on economic innovation and job creation resulting from a disregard of critical contextual features and the characteristics of young entrepreneurs themselves The authors give due acknowledgment of the importance of both factors and so fully understand the impediments to youth entrepreneurship especially in a transition context Furthermore they seek to assess the opportunities and constraints of promotion policies in transition economies Most importantly the book provides the first empirical contribution to youth entrepreneurship in Central and Eastern Europe by offering a representative number of case studies The book will be invaluable reading for scholars and students of transition and developing countries particularly those with an interest in entrepreneurship

Strategic

Autonomy and Economic Power Vitor Bento, 2022-08-04 This book examines the effect of economic power on a state's strategic autonomy Strategic autonomy is a fundamental condition for the availability of strategic options in the interaction of states This book provides the first clear operational definition of the concept and offers an analysis of the relevance of the national economy to strategic autonomy The main sources of economic power size of the economy position in trade and technological networks savings wealth and finance and their impact on strategic autonomy are analyzed in depth The strategic governance of the national economy is also addressed as a way of ensuring that national economic power can work as strategic power for a country providing it with strategic autonomy The strategies pursued by China which in under four decades has gone from an underdeveloped state to the main challenger of the dominant world power and Germany which despite being defeated in World War II having no nuclear weapons and having chosen to be a civilian power became the dominant power in Europe are analyzed in depth as two paradigmatic examples of the theory developed by the book This

book will be of much interest to students of strategic studies economics foreign policy and International Relations
