Adaptations in the Franchise Era Kyle Meikle, 2019-01-24 Adaptations in the Franchise Era re evaluates adaptation's place in a popular culture marked by the movement of content and audiences across more media borders than ever before. While adaptation has historically been understood as the transfer of stories from one medium to another more often than not from novel to film the growing interconnectedness of media and media industries in the early twenty first century raises new questions about the form and function of adaptation as both a product and a process. Where does adaptation fit within massive franchises that span pages stages screens and theme parks? Rising scholar Kyle Meikle illuminates adaptation's enduring and essential role in the rise of franchises in the 2000s and 2010s. During that decade and a half adaptations set the foundation for multiplexed multiplied film series piloted streaming television's forays into original programming found their way into audiences' hands in apps and video games and went live in theatrical experiences on Broadway and beyond. The proliferation of adaptations was matched only by a proliferation of adaptation as fans remixed and remade their favourite franchises online and off. This volume considers how producers and consumers defined adaptations and how adaptations defined themselves through the endless intertextual play of the franchise era.

Sound Design is the New Score Danijela Kulezic-Wilson, 2020 The practice of blurring the line between score and sound design has transformed contemporary film soundscape by challenging not only the long established hierarchical relationships between dialogue music and sound effects but also the modes of perception shaped by classical soundtrack practices The methods of this new trend rely on the language of contemporary popular and art music producing soundtracks in which it is difficult to tell the difference between score and ambient sound where pieces of electroacoustic music are merged with diegetic sound sound effects are absorbed into the score or treated as music and diegetic sound is treated as *musique concrète* In *Sound Design is the New Score* Kulezic Wilson explores theoretical aesthetic and sensuous dimensions of this new trend providing a multifaceted portrait of a practice which recognizes the interconnectedness of all soundtrack elements and emphasizes their inherent musicality The aesthetic concerns of this practice are illuminated through the concept of the aesthetics of reticence which rejects classical narrative and scoring conventions and uses integrated soundtrack strategies to create the space for mystery in art and for individuality in the cinematic experience The book's emphasis on sensuous and musical aspects of this practice informed by the feminist discourse on the erotics of art challenges popular notions about sensory cinema demonstrating that the sensuousness of film form and its soundscapes is more sophisticated than simply being the result of excessive sensory stimulation facilitated by the use of digital technology or the intensified aesthetics it inspires The discussion is supported by a wide range of case studies from American Independent Asian Australian and European cinemas including films by Shane Carruth Claire Denis Hou Hsiao Hsien Harmony Korine David Michôd Gus Van Sant and Peter Strickland
