Ethical Practices for Sustainable Construction Digitalisation

Olugbenga Oladinrin,Douglas Aghimien,Steve Goodhew,2025-09-30 This volume provides a framework for ethical and sustainable digitalization in the construction industry The fourth industrial revolution has significantly changed how industries worldwide operate and deliver their products and services This paradigm shift has brought with it ubiquitous emerging physical biological and digital technologies that are disrupting activities in industries across the globe The construction industry is not immune to the disruption of these technologies From solving the issues of poor cost time and quality that has bedevilled the industry for a long while to ensuring clients are satisfied and workers are safe digital technologies have proven to be effective in improving how the construction industry function For instance the use of building information modelling has garnered considerable attention in addressing salient design and collaboration issues among others facing the industry In the same vein the internet of things big data analytics cloud computing drones robotics sensors and a host of other technologies have been explored to improve the management and delivery of construction projects Regrettably this concept of ethics has been downplayed in the quest for the digital transformation of construction industries worldwide For the successful digitalisation of the construction industry which relies heavily on human interaction with technology the role of ethics cannot be overlooked There is an absence of a roadmap for the ethical use of digital technologies in the digitalisation of the construction industry This book which is designed to give direction for the ethical use of digital tools in the construction industry fills that gap

Economics of Property Management: The Building as a Means of Production

Herman Tempelmans Plat, Frank Heynick,2012-06-25 The economic analysis of a building is a complex subject and traditionally it has focused on a single aspect of the structure or a single part of the construction process Dr Tempelmans Plat is a leading proponent of a new methodology which focuses on the building as a stock of services to be supplied over a long lifespan This method is more realistic since it takes into account the changes in use and the adaptation of the building over its life This book will be the first to make this method comprehensible to a wide audience of postgraduate students and professionals in the field of construction economics

Office Markets and Public Policy

Colin Jones,2013-03-04 This is the first book that looks at how offices and office markets in cities have changed over the last 30 years It analyses the long term trends and processes within office markets and the interaction with the spatial economy

and the planning of cities It draws on examples around the world and looking forward at the future consequences of information communication technologies and the sustainability agenda it sets out the challenges that now face investors The traditional business centres of cities are losing their dominance to the brash new centres of the 1980s and 1990s as the concept of the central business district becomes more diffuse Edge cities business space and office parks have entered the vocabulary as offices have also decentralised The nature and pace of changes to office markets set within evolving spatial structures of cities has had implications for tenants and led to a demand for shorter leases The consequence is a rethink of the traditional perception of property investment as a secure long term investment and this is reflected in reduced investment holding periods by financial institutions Office Markets land management property and real estate urban planning and urban studies It will also be of interest to researchers property professionals policy makers and planning practitioners
