Garrett Eckbo Modern Landscapes For Living:

Garrett Eckbo Marc Treib, Dorothée Imbert, 2005 A beautifully illustrated consideration of the life and career of modernist landscape architect Garrett Eckbo

Modern Landscape Architecture Marc Treib, 1994-07-25 Twenty two essays that provide a forum for assessing the tenets accomplishments and limits of modernism in landscape architecture and for formulating ideas about possible directions for the future of the discipline These twenty two essays provide a rich forum for assessing the tenets accomplishments and limits of modernism in landscape architecture and for formulating ideas about possible directions for the future of the discipline During the 1930s Garrett Eckbo Dan Kiley and James Rose began to integrate modernist architectural ideas into their work and to design a landscape more in accord with the life and sensibilities of their time Together with Thomas Church whose gardens provided the setting for California living they laid the foundations for a modern American landscape design This first critical assessment of modern landscape architecture brings together seminal articles from the 1930s and 1940s by Eckbo Kiley Rose Fletcher Steele and Christopher Tunnard and includes contributions by contemporary writers and designers such as Peirce Lewis Catherine Howett John Dixon Hunt Peter Walker and Martha Schwartz who examine the historical and cultural framework within which modern landscape designers have worked There are also essays by Lance Necker Reuben Rainey Gregg Bleam Michael Laurie and Marc Treib that discuss the designs and legacy of the Americans Tunnard Eckbo Church Kiley and Robert Irwin Doroth e Imbert takes up Pierre Emile Legrain and French modernist gardens of the 1920s and Thorbj rn Andersson reviews experiments with stylized naturalism developed by Erik Glemme and others in the Stockholm park system

The American Lawn Georges Teyssot, 1999 The site of political demonstrations sporting events and barbecues and the object of loving if not obsessive care and attention the lawn is also symbolically tied to our notions of community and civic responsibility serving in the process as one of the foundations of democracy

The Modern Landscapes of Ted Smyth Rod Barnett, Jacqueline Margetts, 2017-01-06 The modern period in landscape architecture is enjoying the fascinated appreciation of scholars and historians in Europe and the Americas and new themes new subjects and new appraisals are appearing This book contributes to the conversation by focusing on the work of a singular designer who spent his entire career in a province of the North Island of New Zealand Ted Smyth practiced an assured landscape modernism without ever seeing the designs of his forebears or his contemporaries working in the UK Europe and the United States Designing in isolation from the mainstream of modernism and a little after its high tide Smyth produced a series of gardens that provoke a revaluation of the diffusionist model of influence The book explains and describes the evolution of Smyth s design vocabulary and relates it to the development of tropical landscape modernism in other Asia Pacific sites It shows how a culture of garden modernism can be generated from within a particular locale and highlights Smyth s engagement with Mori design traditions in search of a specific expression of the high modern essentialism of place

Landscape Theory in Design Susan Herrington, 2016-12-08

Phenomenology Materiality Cybernetics Palimpsest Cyborgs Landscape Urbanism Typology Semiotics Deconstruction the minefield of theoretical ideas that students must navigate today can be utterly confusing and how do these theories translate to the design studio Landscape Theory in Design introduces theoretical ideas to students without the use of jargon or an assumption of extensive knowledge in other fields and in doing so links these ideas to the processes of design In five thematic chapters Susan Herrington explains the theoretic groundings of the theory of philosophy why it matters to design an example of the theory in a work of landscape architecture from the twentieth and twenty first centuries debates surrounding the theory particularly as they elaborate modern and postmodern thought and primary readings that can be read as companions to her text An extensive glossary of theoretical terms also adds a vital contribution to students comprehension of theories relevant to the design of landscapes and gardens Covering the design of over 40 landscape architects architects and designers in 111 distinct projects from 20 different countries Landscape Theory in Design is essential reading for any student of the landscape

American National Biography John A. Garraty, Mark C. Carnes, 2005-05-12 American National Biography is the first new comprehensive biographical dictionary focused on American history to be published in seventy years Produced under the auspices of the American Council of Learned Societies the ANB contains over 17 500 profiles on historical figures written by an expert in the field and completed with a bibliography The scope of the work is enormous from the earliest recorded European explorations to the very recent past

Designing the American Century Thomas J. Campanella, 2025-07-08 A richly illustrated look at the lives and collaborations of two unsung giants of American landscape and urban design Gilmore D Clarke and Michael Rapuano were the foremost spatial designers of the American century Their vast portfolio of public landscapes propelled the legacy of Frederick Law Olmsted and Calvert Vaux into the motor age

touching the lives of millions and changing the face of the nation *Designing the American Century* recovers the forgotten legacy of Clarke and Rapuano whose parks and parkways highways and housing estates helped modernize for better or worse the American metropolis With the patronage of public works titan Robert Moses Clarke and Rapuano transformed New York over a span of fifty years revitalizing the city's immense park system but also planning expressways public housing and urban renewal projects that laid waste to entire sections of the city In this groundbreaking work Thomas J Campanella describes how Clarke and Rapuano helped create some of the metropolitan region's most iconic landscapes from the Central Park Zoo and Conservatory Garden to the Henry Hudson Parkway and Riverside Park Jones Beach the Palisades and Taconic State Parkways and the Brooklyn Heights Promenade He shows how they left their mark far beyond Gotham as well with projects as diverse as Yellowstone's Mammoth Hot Springs the Mount Vernon Memorial Highway site plans for the Pentagon and CIA headquarters and Montreal's Olympic Park Richly illustrated with a wealth of previously unpublished drawings plans and photographs *Designing the American Century* fills one of the last major gaps in the history of American urbanism

Private Landscapes Pamela Burton, Marie Botnick, 2002 When we think of the gardens of Southern California we tend to think of the enormous semiarid landscapes of the Huntington and Rancho Los Alamitos often built on the sprawling grounds of former ranches But there is another garden tradition in Southern California the modest rectangular suburban plots designed by the most famous architects of mid century modernism Richard Neutra Rudolph Schindler Gregory Ain Raphael Soriano Harwell Hamilton Harris A Quincy Jones and John Lautner These architects saw the garden as an outdoor extension of the space of the houses they designed rather than a neo Spanish fantasy to be added later by a landscapist Their modern gardens made use of low maintenance drought resistant plants and made room for informal outdoor living by children and adults with an emphasis on recreation and exercise The first book of its kind *Private Landscapes* profiles twenty significant gardens and their accompanying houses by these celebrated architects Using contemporary photographs by Julius Shulman and newly commissioned color images along with plans and plant lists *Private Landscapes* provides a never before seen look at these gardens As beautiful and practical now as they were 50 years ago these designs continue to provide inspiration for gardeners and designers everywhere

Recovering Landscape James Corner, 1999-08 The past decade has been witness to a remarkable resurgence of interest in landscape While this recovery invokes a return of past traditions and ideas it also implies renewal invention and transformation *Recovering Landscape* collects a number of essays that discuss why landscape is gaining increased attention today and what new possibilities might emerge from this situation Themes such as reclamation urbanism infrastructure geometry representation and temporality are explored in discussions drawn from recent developments not only in the United States but also in the Netherlands France India and Southeast Asia The contributors to this collection all leading figures in the field of landscape architecture include Alan Balfour Denis Cosgrove Georges Descombes Christophe Girot Steen Hoyer David Leatherbarrow Bart Lootsma Sebastien Marot Anuradha Mathur Marc Treib

and Alex Wall **Pioneers of American Landscape Design II** Charles A. Birnbaum, Julie K. Fix, 1995 **Forest and Garden** Melanie Louise Simo, 2003 How wild and managed or artificially arranged environments coexist has long been a matter of intense debate among foresters and landscape professionals **Hawaiian Modern** Vladimir Ossipoff, Marc Treib, 2007-01-01 At the forefront of the postwar phenomenon known as tropical modernism Vladimir Ossipoff 1907 1998 won recognition as the master of Hawaiian architecture Although he practiced at a time of rapid growth and social change in Hawaii Ossipoff criticized large scale development and advocated environmentally sensitive designs developing a distinctive form of architecture appropriate to the lush topography light and microclimates of the Hawaiian islands This book is the first to focus on Ossipoff's career presenting significant new material on the architect and situating him within the tropical modernist movement and the cultural context of the Pacific region The authors discuss how Ossipoff synthesized Eastern and Western influences including Japanese building techniques and modern architectural principles In particular they demonstrate that he drew inspiration from the interplay of indoor and outdoor space as advocated by such architects as Frank Lloyd Wright applying these to the concerns and vernacular traditions of the tropics The result was a vibrant and glamorous architectural style captured vividly in archival images and new photography As the corporate projects and private residences that Ossipoff created for such clients as IBM Punahou School Linus Pauling Jr and Clare Boothe Luce surpass their fiftieth anniversaries critical assessment of these structures offered here by distinguished scholars in the field will illuminate Ossipoff's contribution to the universal challenge of making architecture that is delightfully particular to its place and durable over time *Illustrated History of Landscape Design* Elizabeth Boult, Chip Sullivan, 2010-02-08 A visual journey through the history of landscape design For thousands of years people have altered the meaning of space by reshaping nature As an art form these architectural landscape creations are stamped with societal imprints unique to their environment and place in time *Illustrated History of Landscape Design* takes an optical sweep of the iconic landscapes constructed throughout the ages Organized by century and geographic region this highly visual reference uses hundreds of masterful pen and ink drawings to show how historical context and cultural connections can illuminate today's design possibilities This guide includes Storyboards case studies and visual narratives to portray spaces Plan section and elevation drawings of key spaces Summaries of design concepts principles and vocabularies Historic and contemporary works of art that illuminate a specific era Descriptions of how the landscape has been shaped over time in response to human need Directing both students and practitioners along a visually stimulating timeline *Illustrated History of Landscape Design* is a valuable educational tool as well as an endless source of inspiration *Transforming Landscapes* Françoise Fromonot, 2020-02-24 Michel Desvigne is the most renowned French landscape architect in the world Based in Paris he has held guest professorships at such distinguished institutions as the Architectural Association in London and Harvard University Desvigne's projects have a strong strategic and conceptual component Urban infrastructure projects play a major role and emphasize the urban

planning and design expertise evident in his landscape architecture The book documents ten of Devigne s major projects from France the US Spain and Qatar in which he is responsible not only for the landscape architecture but for coordination of the entire project How can such highly complex projects be realized What does the intellectual thought process look like What specific problems arise in their realization **Reciprocal Landscapes** Jane Hutton,2019-09-06 How are the far away invisible landscapes where materials come from related to the highly visible urban landscapes where those same materials are installed Reciprocal Landscapes Stories of Material Movements traces five everyday landscape construction materials fertilizer stone steel trees and wood from seminal public landscapes in New York City back to where they came from Drawing from archival documents photographs and field trips the author brings these two separate landscapes the material s source and the urban site where the material ended up together exploring themes of unequal ecological exchange labor and material flows Each chapter follows a single material s movement guano from Peru that landed in Central Park in the 1860s granite from Maine that paved Broadway in the 1890s structural steel from Pittsburgh that restructured Riverside Park in the 1930s London plane street trees grown on Rikers Island by incarcerated workers that were planted on Seventh Avenue north of Central Park in the 1950s and the popular tropical hardwood ipe from northern Brazil installed in the High Line in the 2000s Reciprocal Landscapes Stories of Material Movements considers the social political and ecological entanglements of material practice challenging readers to think of materials not as inert products but as continuous with land and the people that shape them and to reimagine forms of construction in solidarity with people other species and landscapes elsewhere

Representing Landscape Architecture Marc Treib,2008-02-19 Representing Landscape Architecture offers a broad investigation of how the designed landscape is and has been represented for design study for criticism and even for its realization It has been said that we can only realize what we can imagine But in order to realize we must convey ideas to others as well as to ourselves Representation is by no means neutral and the process of communication the process by which the imagination takes its first form itself necessarily limits the range of our design possibilities Computers further remove from cognitive processes and raise new questions about methods and limits Written by a team of renowned practitioners and academics this book is the best available reference to date on the many dimensions of landscape representation Historic Residential Suburbs David L. Ames,Linda Flint McClelland,2002 Landscape Design in Color Mira Engler,2022-12-27 Architects landscape architects and urban designers experiment with color and lighting effects in their daily professional practice Over the past decade there has been a reinvigorated discussion on color within architectural and cultural studies Yet scholarly enquiry within landscape architecture has been minimal despite its important role in landscape design This book posits that though color and lighting effects appear natural fleeting and difficult to comprehend the sensory palette of built landscapes and gardens has been carefully constructed to shape our experience and evoke meaning and place character Landscape Design in Color History Theory and Practice 1750 to Today is an inquiry into the themes theories and debates on

color and its impact on practice in Western landscape architecture over the past three centuries Divided into three key periods each chapter in the book looks at the use of color in the written and built work of key prominent designers The book investigates thematic juxtapositions such as natural and artificial color and line design and draftsmanship sensation and concept imitation and translation deception and display and decoration and structure and how these have appeared faded disappeared and reappeared throughout the ages Richly designed and illustrated in full color throughout including color palettes this book is a must have resource for students scholars and design professionals in landscape architecture and its allied disciplines
