Contractor's Guide to the Building Code Jack M. Hageman, 2008 Don't let your jobs be held up by failing code inspections. Smooth sign off by the inspector is the goal but to make this ideal happen on your job site you need to understand the requirements of latest editions of the International Building Code and the International Residential Code. Understanding what the codes require can be a real challenge. This new completely revised Contractor's Guide to the Building Code cuts through the legalese of the code books. It explains the important requirements for residential and light commercial structures in plain simple English so you can get it right the first time. Search and Optimization by Metaheuristics Ke-Lin Du, M. N. S.

Swamy, 2016-07-20 This textbook provides a comprehensive introduction to nature inspired metaheuristic methods for search and optimization including the latest trends in evolutionary algorithms and other forms of natural computing. Over 100 different types of these methods are discussed in detail. The authors emphasize non standard optimization problems and utilize a natural approach to the topic moving from basic notions to more complex ones. An introductory chapter covers the necessary biological and mathematical backgrounds for understanding the main material. Subsequent chapters then explore almost all of the major metaheuristics for search and optimization created based on natural phenomena including simulated annealing, recurrent neural networks, genetic algorithms and genetic programming, differential evolution, memetic algorithms, particle swarm optimization, artificial immune systems, ant colony optimization, tabu search and scatter search, bee and bacteria foraging algorithms, harmony search, biomolecular computing, quantum computing and many others. General topics on dynamic multimodal constrained and multiobjective optimizations are also described. Each chapter includes detailed flowcharts that illustrate specific algorithms and exercises that reinforce important topics. Introduced in the appendix are some benchmarks for the evaluation of metaheuristics. Search and Optimization by Metaheuristics is intended primarily as a textbook for graduate and advanced undergraduate students specializing in engineering and computer science. It will also serve as a valuable resource for scientists and researchers working in these areas as well as those who are interested in search and optimization methods. Music Apps for Musicians and Music Teachers Elizabeth C. Axford, 2015-02-19

In today's digital age learning and creating music has never been so easy and affordable. Anyone can enhance their musical knowledge, skills and creativity with the multitude of music apps available. However sifting through thousands of music apps in the Apple App Store and Google Play can be a daunting task for any musician or music instructor. But not anymore. Having spent countless hours researching the most interesting, useful, educational, fun and easy to use music apps, Elizabeth C. Axford in Music Apps for Musicians and Music Teachers surveys the landscape of music related apps for both iOS and Android mobile devices including tablets and smartphones. Music Apps for Musicians and Music Teachers lists hundreds of music related apps organized by category including singing, musical instruments, music theory and composition, songwriting, improvisation, recording, evaluating music performances, listening to music, music history and literature, music appreciation.
