The Routledge Handbook of Food Ethics

Mary Rawlinson, Caleb Ward, 2016-07-01 While the history of philosophy has traditionally given scant attention to food and the ethics of eating in the last few decades the subject of food ethics has emerged as a major topic encompassing a wide array of issues including labor justice public health social inequity animal rights and environmental ethics This handbook provides a much needed philosophical analysis of the ethical implications of the need to eat and the role that food plays in social cultural and political life Unlike other books on the topic this text integrates traditional approaches to the subject with cutting edge research in order to set a new agenda for philosophical discussions of food ethics The Routledge Handbook of Food Ethics is an outstanding reference source to the key topics problems and debates in this exciting subject and is the first collection of its kind Comprising over 35 chapters by a team of international contributors the Handbook is divided into 7 parts the phenomenology of food gender and food food and cultural diversity liberty choice and food policy food and the environment farming and eating other animals food justice Essential reading for students and researchers in food ethics it is also an invaluable resource for those in related disciplines such as environmental ethics and bioethics

Beyond Moral Fundamentalism Steven Fesmire, 2024 Moral fundamentalism is the habit of acting as though one has access to the exclusively right way to diagnose problems along with the single approvable practical solution to any particular problem This approach causes us to oversimplify situations neglect broader context take refuge in dogmatic absolutes ignore possibilities for finding common ground assume privileged access to the right way to proceed and shut off honest inquiry In this way moral fundamentalism exacerbated by social media silos also makes the worst of native impulses toward social bonding and antagonism This makes it impossible to debate and achieve superordinate social goals such as public health justice security sustainability peace and democracy Drawing from John Dewey's pluralistic and pragmatic approach to philosophical questions Steven Fesmire develops an alternative to both the oversimplification of moral fundamentalism and the arbitrariness of relativism His pragmatic pluralism is set up as a response to particular conditions and consequences so it gains practical leverage with complex ethical political educational and policy problems without flattening variability among values or presuming that abstract theories can determine what we ought to do He argues that the reductive monistic premise that logically underlies moral fundamentalism is both unwarranted and constrictive and there is little to be said in favor of the grand philosophical quest for a unifying principle that cannot be accommodated within a wider pluralistic approach In a concrete and engaging style Fesmire clarifies and illustrates the promises and challenges of democratic decision making in societies struggling to grow beyond moral fundamentalism

A Handbook of Food Crime Allison Gray, Ronald Hinch, 2019-10-09 Food today is over corporatized and under regulated It is involved in many immoral harmful and illegal practices along production distribution and consumption systems These problematic conditions have significant consequences on public health and well being nonhuman animals and the environment often simultaneously In this insightful book Gray and Hinch explore the phenomenon of food crime Through discussions of food safety food fraud food insecurity

agricultural labour livestock welfare genetically modified foods food sustainability food waste food policy and food democracy they problematize current food systems and criticize their underlying ideologies Bringing together the best contemporary research in this area they argue for the importance of thinking criminologically about food and propose radical solutions to the realities of unjust food systems *The ^AOxford Handbook of Dewey* Steven Fesmire,2019-08-19 The Oxford Handbook of Dewey is a comprehensive volume spanning thirty five chapters wherein leading scholars help researchers access particular aspects of Dewey s thought navigate the enormous and rapidly developing literature and participate in current scholarship in light of prospects in key topical areas Beginning with a framing essay calling for a transformation of philosophical research inspired by Dewey contributors interpret appraise and critique Dewey s philosophy

Controversies in Latin American Bioethics Eduardo Rivera-López,Martin Hevia,2019-06-19 This book offers a first rate selection of academic articles on Latin American bioethics It covers different issues such as vulnerability abortion biomedical research with human subjects environment exploitation commodification reproductive medicine among others Latin American bioethics has been to an important extent parochial and unable to meet stringent international standards of rational philosophical discussion The new generations of bioethicists are changing this situation and this book demonstrates that change All articles are written from the perspective of Latin American scholars from several disciplines such as philosophy and law Working with the tools of analytical philosophy and jurisprudence this book defends views with rational argument and opening for pluralistic discussion **What Is Agriculture For?** Paul B. Thompson,Professor Emeritus Department of Philosophy Paul B Thompson,2025-08-15 The leading idea for this book were developed through lectures including The Harold Stoner Lectures at California Lutheran University and the Tarim ve Gıda Etiği Kongresi Uluslararası Katılımlı at the University of Ankara both in 2017 as well as the 2018 Parliament of World Religions I would like to thank my audiences at these events most especially for the encouragement I received I also presented papers summarizing aspects of the research at the European Society for Agriculture and Food Ethics the Society for Philosophy and Technology and Asia Pacific Society for Agriculture and Food Ethics A book chapter presenting the basic themes of Chapter 4 appeared in *Contested Sustainability Discourses in the Agrifood System* D Constance J Konefal and M Hatemaki Eds London 2018 Earthscan pp 42 58 The section How Philosophers Approach Ethics from the Introduction is a lightly edited reprint of a similar section in Paul B Thompson *From Field to Fork Food Ethics for Everyone* New York 2015 Oxford University Press Provided by publisher *Food Education and Gastronomic Tradition in Japan and France* Haruka Ueda,2022-11-24 Drawing on ethical and sociological theories of food this book presents a new approach to food education that moves beyond nutrition centred education Food education has gained increasing scientific and political importance in many countries as a promising way to change contemporary eating However many practices fail to address two epistemological obstacles regarding its very components food and education Food has largely been thought of from a nutritionistic viewpoint alone and the ethical issues

over children's freedom of choice and well-being have been absent. This book resolves these problems by applying ethical and sociological theories of food and analysing food education in two pioneering countries Japan and France. The book focuses on taste education and gastronomy as two key concepts which have great potential to positively impact food education. Taste education is a promising alternative to nutrition-centred pedagogy which foregrounds the experience and pleasure of eating food, creating an environment for taste sensibility and food curiosity. From taste education, the picture can be broadened to examine the role and impact of gastronomy in food education. Examining the cultural traditions of France and Japan reveals how gastronomy can impact eating habits and food cultures and how these criteria should be an intrinsic part of food education. The book concludes by constructing an integrative theory for food education that moves beyond nutrition-centred education for the benefit of one's well-being. This book will greatly interest students, scholars, policymakers and educators working on food education, food-related issues at the intersection between nutritional and social sciences and gastronomes searching for a pedagogical guide for developing their capabilities to eat in a more humanistic way.

Food and Health

Viviane Clavier, Jean-Philippe De Oliveira, 2019-05-29 Food is a major health issue; the links between diet and health are dominant in nutrition discourse and practice. *Food and Health: Actor Strategies in Information and Communication* identifies the informational practices of nutrition professionals and consumers to study the structural elements of food and health. It analyzes the communication strategies of actors and the dissemination and use of information related to both food for health and health through food. The book considers nutrition from the point of view of public policies, educational organizations, preventive measures, consumers and patients.

Animals in Our Midst: The Challenges of Co-existing with Animals in the

Anthropocene Bernice Bovenkerk, Jozef Keulartz, 2021-04-29 This Open Access book brings together authoritative voices in animal and environmental ethics who address the many different facets of changing human-animal relationships in the Anthropocene. As we are living in complex times, the issue of how to establish meaningful relationships with other animals under Anthropocene conditions needs to be approached from a multitude of angles. This book offers the reader insight into the different discussions that exist around the topics of how we should understand animal agency, how we could take animal agency seriously in farms, urban areas and the wild, and what technologies are appropriate and morally desirable to use regarding animals. This book is of interest to both animal studies scholars and environmental ethics scholars as well as to practitioners working with animals such as wildlife managers, zookeepers and conservation biologists.

From Assessing to

Conserving Biodiversity Elena Casetta, Jorge Marques da Silva, Davide Vecchi, 2019-06-17 This open access book features essays written by philosophers, biologists, ecologists and conservation scientists facing the current biodiversity crisis. Despite increasing communication, accelerating policy and management responses and notwithstanding improving ecosystem assessment and endangered species knowledge, conserving biodiversity continues to be more a concern than an accomplished task. Why is it so? The overexploitation of natural resources by our species is a frequently recognised factor

while the short term economic interests of governments and stakeholders typically clash with the burdens that implementing conservation actions imply But this is not the whole story This book develops a different perspective on the problem by exploring the conceptual challenges and practical defiance posed by conserving biodiversity namely on the one hand the difficulties in defining what biodiversity is and characterizing that thing to which the word biodiversity refers to on the other hand the reasons why assessing biodiversity and putting in place effective conservation actions is arduous Eating Ethically Jonathan K. Crane, 2017-12-19 Few activities are as essential to human flourishing as eating and fewer still are as ethically fraught Eating well is particularly confusing We live amid excess faced with conflicting recommendations contradictory scientific studies and complex moral medical and environmental consequences that influence our choices A new eating strategy is urgently needed one grounded in ethics informed by biology supported by philosophy and theology and ultimately personally achievable Eating Ethically argues persuasively for more adaptive eating practices Drawing on religion medicine philosophy cognitive science art ethics and more Jonathan K Crane shows how distinguishing among the eater the eaten and the act of eating promotes a radical reorientation away from external cues and toward internal ones This turn is vital for survival according to classic philosophy on appetite and contemporary studies of satiety metabolic science as well as metaphysics and religion By intertwining ancient wisdom from Judaism Christianity and Islam with cutting edge research Crane concludes that ethical eating is a means to achieve both personal health and social cohesion Grounded in science and tradition Eating Ethically shows us what it truly means to eat well Routledge Handbook of Food as a Commons Jose Luis Vivero-Pol, Tomaso Ferrando, Olivier De Schutter, Ugo Mattei, 2018-12-17 From the scientific and industrial revolution to the present day food an essential element of life has been progressively transformed into a private transnational mono dimensional commodity of mass consumption for a global market But over the last decade there has been an increased recognition that this can be challenged and reconceptualized if food is regarded and enacted as a commons This Handbook provides the first comprehensive review and synthesis of knowledge and new thinking on how food and food systems can be thought interpreted and practiced around the old new paradigms of commons and commoning The overall aim is to investigate the multiple constraints that occur within and sustain the dominant food and nutrition regime and to explore how it can change when different elements of the current food systems are explored and re imagined from a commons perspective Chapters do not define the notion of commons but engage with different schools of thought the economic approach based on rivalry and excludability the political approach recognizing the plurality of social constructions and incorporating epistemologies from the South the legal approach that describes three types of proprietary regimes private public and collective and different layers of entitlement bundles of rights and the radical activist approach that considers the commons as the most subversive coherent and history rooted alternative to the dominant neoliberal narrative These schools have different and rather diverging epistemologies vocabularies ideological stances and policy proposals to deal with the

construction of food systems their governance the distributive implications and the socio ecological impact on Nature and Society The book sparks the debate on food as a commons between and within disciplines with particular attention to spaces of resistance food sovereignty de growth open knowledge transition town occupations bottom up social innovations and organizational scales local food national policies South South collaborations international governance and multi national agreements Overall it shows the consequences of a shift to the alternative paradigm of food as a commons in terms of food the planet and living beings
