from each chapter fully worked solutions to representative problems from the text and in many cases includes exploration of

a solution over a range of values using the software package Interactive Heat Transfer v2.0 This supplement is intended to

help students focus on the key concepts from the text verify their solutions by comparing them to the authors own worked

solutions and use computer tools to explore the behavior of the systems in question Each worked solution follows the

structured problem solving approach from the text Comments throughout the solution help in explaining the thought process

and a Comments section at the end of each solution discusses reasonableness and/or implications of the answer Introduction
