But the hope of a settlement stands on much shakier ground than the participants suspect says scientist Daniel Hillel What they don't see and what most observers overlook is that the severely wounded environment of the region threatens to undercut any long lasting accord The widespread destruction of vegetation and natural habitats the erosion of uplands the desertification of semiarid areas waterlogging and salinization of valleys and most of all the depletion and pollution of precious water resources no political formula will promote lasting peace in the Middle East argues Hillel unless it addresses these ills In Rivers of Eden Hillel examines this natural crisis and explores its crucial role in the political and economic future of this troubled region He shows how environmental degradation exacerbated by an uncontrolled explosion of population is itself a cause of strife in the area dislocating and disorienting countless people and fomenting despair and extremism And yet he adds since no one country in the region can solve its water problem alone the very cause of conflict is also an inducement for promoting peace This hope illuminates Rivers of Eden as it traces the vital issue of water in the Middle East ranging from its first appearance in folklore and religion to the present As Hillel shows the history of civilization in the Middle East is in

many ways the story of how societies in this arid environment managed or mismanaged their land and water resources Here we see how this history plays out from intertribal rivalry for instance the legendary War of Basoos begun over the errant trespass of a thirsty camel to the choking of the mighty Nile at Aswan and the slow salt poisoned death of Mesopotamia From the historical and scientific circumstances of the region s water resources Hillel turns to conflicts brewing even now over the waters of the Euphrates Tigris the Nile the Jordan and several groundwater aquifers The future welfare of the Middle East as of many economies around the world depends on timely action to resolve these issues This book offers hope for such a resolution A world renowned environmental scientist Hillel has worked throughout the Middle East as consultant to the governments of Israel Pakistan the Sudan Iran Egypt Ethiopia and elsewhere and as an advisor to the World Bank He brings first hand insight to his account and an urgent concern for the degraded Fertile Crescent which he believes can and must be rehabilitated Comprehensive penetrating and clear his book compels the attention of anyone interested in the future of the Middle East and of the environment at large Monographic Series Library of Congress,1981 **Library of Congress Catalogs** Library of Congress,1982
