Drawing inspiration from the core recommended medical physiology textbooks Guyton and Hall's Textbook of Medical Physiology and Essentials of Medical Physiology by K Sembulingam Prema Sembulingam this series does not reproduce their content but instead reimagines it through storytelling analogies and practical clinical scenarios Each chapter integrates scientific accuracy with an engaging easy to follow style that speaks to both the analytical and imaginative sides of the reader's mind The goal is not only to prepare readers for examinations such as MCQs SEQs OSCEs and Viva voce but also to nurture deep conceptual understanding and the ability to apply physiological principles to real life patient cases In these volumes you will find Core physiological concepts woven into relatable stories and analogies Integrated clinical cases to illustrate the application of knowledge in diagnosis and treatment Structured exam oriented sections for quick review and retention Spotter and viva preparation tips to build confidence in assessments Medicine is not just about memorizing facts it is about understanding the harmony and disharmony within the human body By presenting physiology as a living story this series aims to make learning not only effective but enjoyable It is my sincere hope that this approach helps medical students young doctors and allied health professionals connect with the subject more deeply think more critically and carry this understanding into their practice ultimately benefiting the patients they will serve Dr Uthayasooriya Amarasena Author
