Ground-water Levels in Observation Wells in Kansas, 1962 Margaret E. Broeker, John Durfee Winslow, 1964 **Bulletin** Kansas Geological Survey, 1964 Scientific and Technical Aerospace Reports, 1995 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database **Optical Cavities for Optical Atomic Clocks, Atom**

Interferometry and Gravitational-Wave Detection Miguel Dovalé Álvarez, 2019-08-10 Devised at the beginning of the 20th century by french physicists Charles Fabry and Alfred Perot the Fabry Perot optical cavity is perhaps the most deceptively simple setup in optics and today a key resource in many areas of science and technology This thesis delves deeply into the applications of optical cavities in a variety of contexts from LIGO s 4 km long interferometer arms that are allowing us to observe the universe in a new way by measuring gravitational waves to the atomic clocks used to realise time with unprecedented accuracy which will soon lead to a redefinition of the second and the matterwave interferometers that are enabling us to test and measure gravity in a new scale The work presented accounts for the elegance and versatility of this setup which today underpins much of the progress in the frontier of atomic and gravitational experimental physics

Therapeutic Medicinal Plants Marta C.T. Duarte, Mahendra Rai, 2015-11-16 Medicinal plants have been used in the prevention diagnosis and elimination of diseases based on the practical experience of thousands of years There is a pressing need to initiate and transform laboratory research into fruitful formulations leading to the development of newer products for the cure of diseases such as AIDS cancer and hepatitis **Genetic Screening** Sandra R. Pupecki, 2006 Gene tests also called DNA based tests the newest and most sophisticated of the techniques used to test for genetic disorders involve direct examination of the DNA molecule itself Other genetic tests include biochemical tests for such gene products as enzymes and other proteins and for microscopic examination of stained or fluorescent chromosomes Genetic tests are used for several reasons including Carrier screening which involves identifying unaffected individuals who carry one copy of a gene for a disease that requires two copies for the disease to be expressed Preimplantation genetic diagnosis prenatal diagnostic testing new born screening Presymptomatic testing for predicting adult onset disorders such as Huntington s disease Presymptomatic testing for estimating the risk of developing adult onset cancers and Alzheimer s disease Confirmational diagnosis of a symptomatic individual forensic identity testing In gene tests scientists scan a patient s DNA sample for mutated sequences A DNA sample can be obtained from any tissue including blood For some types of gene tests researchers design short pieces of DNA called probes whose sequences are complementary to the mutated sequences These probes will seek their complement among the three billion base pairs of an individual s genome If the mutated sequence is present in the patient s genome the probe will bind to it and flag the mutation Another type of DNA testing involves comparing the sequence of DNA bases in a patient s gene to a normal version of the gene This book gathers important new research in this

field **Cumulated Index Medicus** ,1986 **Nuclear Science Abstracts** ,1965 **Mechanical Evaluation Strategies for Plastics** D R Moore,S Turner,2001-11-08 Thermoplastics being non linear viscoelastic impose constraints on testing End products manufactured from these thermoplastics are often anisotropic and tend to complicate the relationships between laboratory test data and service performance Mechanical Evaluation Strategies for Plastic Materials explains new testing strategies for providing service pertinent data within a limited budget It relates the structure of the tests and the functions that they serve to the intrinsic nature of the mechanical properties of thermoplastic materials Colour, Colour Measurement and Colour Change David Saunders,2024-12-18 Colour Colour Measurement and Colour Change the first new book in the expanded Science for Conservators series explains the science of colour colour measurement and colour change for conservators in a clear and comprehensible way elucidating the topic for those with no scientific background The book explains how and why we see colours and how colour and colour change can be measured as well as clarifying why these would be done in a conservation context It then examines the ways in which colour can change such as darkening yellowing fading blanching and patination illustrating these in different types of cultural heritage materials including metals varnishes plastics textiles and paints The final chapter explores how colour change can be reduced in different types of storage and display settings and in particular what can be done to protect against damage by light damp and pollutants This book is an invaluable introduction to all aspects of the science of colour in conservation It is suitable for students in undergraduate and postgraduate conservation programmes as well as being a useful reference guide for practising conservators **Physics of Semiconductor Devices** V. K. Jain,Abhishek Verma,2013-11-27 The purpose of this workshop is to spread the vast amount of information available on semiconductor physics to every possible field throughout the scientific community As a result the latest findings research and discoveries can be quickly disseminated This workshop provides all participating research groups with an excellent platform for interaction and collaboration with other members of their respective scientific community This workshop s technical sessions include various current and significant topics for applications and scientific developments including Optoelectronics VLSI ULSI Technology Photovoltaics MEMS Sensors Device Modeling and Simulation High Frequency Power Devices Nanotechnology and Emerging Areas Organic Electronics Displays and Lighting Many eminent scientists from various national and international organizations are actively participating with their latest research works and also equally supporting this mega event by joining the various organizing committees **Fluid Mechanics, Acoustics, and Design of Turbomachinery** B.
