The Planning Role in Stretching the City Shlomit Flint

Ashery,2023-09-09 This research aims to uncover new insights into minority housing strategies and their impact on densely populated urban areas The study assumes that as space becomes scarce inter and intra groups interactions in the urban space motivate people to maximize the utility of the resources at their disposal This stretch of the built environment provides them with critical selective advantages and a sense of security and belonging Based on two neighbourhoods in London it contributes to our understanding of housing decisions in the context of illegality and shows the capacity of a given urban form for adaptation It creates a new semi private public space partly segregated yet deeply integrated a sphere that on the one hand enables traditional nested places and on the other a fertile environment for integration This manuscript contributes two new ideas to the knowledge base of residential selections and the geography of opportunities The first is a detailed analysis of a hyper segregation integration pattern resulting from complementary residential strategies operating at the individual unit level The second is multidimensional stretching a bottom up initiation that allows individuals to maximize resources through territorial and spatial practices

Computing Geographically David O'Sullivan,2024-01-12 Geographic information science GISc and systems GIS have grown rapidly in recent decades increasingly on a separate track from geographic thought As geography s big ideas such as space place boundaries scale process and relationality have evolved what does this mean for their computational representation This book considers how key concepts have developed in geography and are represented or not in GISc with a view to bridging gaps between the two David O Sullivan shows how revisiting the theoretical underpinnings of geography offers insights on enduring GIS challenges including map projections the modifiable areal unit problem scale and map generalization and the nature of space and place while also enriching geographic thought The book uses examples from across geography s subdisciplines to promote understanding Chapters are self contained essays that can easily form the basis of classroom discussions The companion website provides the figures code to produce versions of selected figures updated web links and other resources

Mission in Marginal Places: The Praxis Michael Pears,Paul Cloke,2016-09-01 The second book in the series focuses on participation and practice and discusses a range of ways in which Kingdom centred mission can be embedded in the actually existing realms of activity and need in marginal places The book explores five different realms of practice each presenting opportunities for innovative expressions of incarnational attentiveness to marginalized communities and people It seeks to inspire prayerful and discerning activity that tunes into what Jesus is doing in local places rather than providing any kind of off the shelf checklist of prefigured mission tactics It challenges readers to take their faith praxis beyond orthodox congregational settings and out into the everyday realms of life in marginal places
