Edward Swift's Big Thicket was also a world in which he was loved unconditionally and that alone makes it worth getting to know

Up in the Air Greg J. Bamber,Jody Hoffer Gittell,Thomas A. Kochan,Andrew Von Nordenflycht,2013-07-15 And you thought the passengers were mad Airline employees are fed up too with pay cuts increased workloads and management s

miserly ways which leave workers to explain to often enraged passengers why flying has become such a miserable experience New York Times December 22 2007 When both an industry's workers and its customers report high and rising frustration with the way they are being treated something is fundamentally wrong In response to these conditions many of the world's airlines have made ever deeper cuts in services and their workforces Is it too much to expect airlines or any other enterprise to provide a fair return to investors high quality reliable service to their customers and good jobs for their employees Measured against these three expectations the airline industry is failing In the first five years of the twenty first century alone U S airlines lost a total of 30 billion while shedding 100 000 jobs forcing the remaining workers to give up over 15 billion in wages and benefits Combined with plummeting employee morale shortages of air traffic controllers and increased congestion and flight delays a total collapse of the industry may be coming Is this state of affairs inevitable Or is it possible to design a more sustainable less volatile industry that better balances the objectives of customers investors employees and the wider society Does deregulation imply total abrogation of government's responsibility to oversee an industry showing the clear signs of deterioration and increasing risk of a pending crisis Greg J Bamber Jody Hoffer Gittel Thomas A Kochan and Andrew von Nordenflycht explore such questions in a well informed and engaging way using a mix of quantitative evidence and qualitative studies of airlines from North America Asia Australia and Europe Up in the Air provides clear and realistic strategies for achieving a better more equitable balance among the interests of customers employees and shareholders Specifically the authors recommend that firms learn from the innovations of companies like Southwest and Continental Airlines in order to build a positive workplace culture that fosters coordination and commitment to high quality service labor relations policies that avoid long drawn out conflicts in negotiating new agreements and business strategies that can sustain investor employee and customer support through the ups and downs of business cycles

Screw Business As Usual Richard Branson, 2017-04-04 From the trailblazing founder and CEO of the Virgin Group a powerful argument for using business to make a positive impact in the world Richard Branson one of the world's most famous and admired business leaders argues that it's time to turn capitalism upside down to shift our values from an exclusive focus on profit to also caring for people communities and the planet As he writes My message is a simple one business as usual isn't working In fact it's business as usual that's wrecking our planet Resources are being used up the air the sea the land are all heavily polluted The poor are getting poorer Many are dying of starvation or because they can't afford a dollar a day for life saving medicine Prophesying doom and gloom is simply not my style I think business can help fix things and create a more prosperous world for everyone I happen to believe in business because I believe that business can be a force for good By that I mean doing good is good for business Screw Business as Usual shows how easy it is for both businesses and individuals to embark on a whole new way of doing things solving major problems and turning our work into something we both love and are proud of

Intuition in Business Eugene Sadler-Smith, 2022-12-19 This book explores the science behind intuitive decision making in business and shows how people's innate capacity for intuition can be nurtured and strengthened to maximize performance We are all familiar with those perplexing situations when we think we just know without knowing how or why we know In professional life it might be the job candidate's CV that checks all the boxes but somehow doesn't stack up should we perform some due diligence and dig a little deeper In personal life it could be the apartment that we're looking to rent that just felt right the minute we walked through the front door should we trust our hunch and grab it while we can What if time is of the essence What if there isn't any more data to be had in the time available In this volume Eugene Sadler Smith examines why situations like these often leave us in a quandary and why these decisions so often leave us in two minds He reveals that metaphorically speaking we have two minds in one brain an analytical mind and an intuitive mind which sometimes come to quite different conclusions about what we ought to do in those consequential decisions that permeate our professional and personal lives Rather than thinking of our intuitive and analytical minds in constant battle with each other we might instead think of them as two information processing systems that have evolved to complement each other The main idea of this book is that our analytical mind evolved to solve whilst our intuitive mind evolved to sense Neither is infallible and our intuitions can be both flawed and marvellous at the same time The author's clear and detailed explanation of the science behind intuition reveals how we can make intelligent use of our intuition to sense and solve our way through a world that is fast moving complex and uncertain
