Macroeconomics Wendy Carlin, David W. Soskice, 2015 **Teaching Macroeconomics** Stefania Paredes Fuentes, 2025-02-12 Through this informative guide the editor and contributing authors equip macroeconomics lecturers with tools and strategies to refresh their teaching content and practice Building educators confidence and inspiring the next generation of passionate economists it emphasises active learning critical thinking and real world applications moving beyond traditional lecture based instruction *Heterodox Macroeconomics* Robert A. Blecker, Mark Setterfield, 2019 p 1
margin 0 0px 0 0px 0 0px font 10 0px Arial The last few decades have witnessed an outpouring of literature on macroeconomic models in the broad heterodox tradition of Marx Keynes Robinson Kaldor and Kalecki These models yield an alternative analytical framework in which the big questions of our day such as how inequality is related to growth or stagnation and whether long run growth is stable or unstable can be fruitfully addressed *Heterodox Macroeconomics* provides an accessible pedagogically oriented treatment of the leading models and approaches in heterodox macroeconomics with clear step by step presentations of core models and their solutions properties and implications *An Introduction to Computational Macroeconomics* Anelí Bongers, Trinidad Gómez, José L. Torres, 2020-09-01 This book presents an introduction to computational macroeconomics using a new approach to the study of dynamic macroeconomic models It solves a variety of models in discrete time numerically using a Microsoft Excel spreadsheet as a computer tool The solved models include dynamic macroeconomic models with rational expectations both non microfounded and microfounded constituting a novel approach that facilitates the learning and use of dynamic general equilibrium models which have now become the principal tool for macroeconomic analysis Spreadsheets are widely known and relatively easy to use meaning that the computer skills

needed to work with dynamic general equilibrium models are affordable for undergraduate students in Advanced Macroeconomics courses

Behavioural Macroeconomics Paul De Grauwe, Yuemei Ji, 2019-10-25 Modern macroeconomics has been based on the paradigm of the rational individual capable of understanding the complexity of the world. This has created a very shallow theory of the business cycle in which nothing happens in the macroeconomy unless shocks occur from outside. Behavioural Macroeconomics Theory and Policy uses a different paradigm. It assumes that individual agents experience cognitive limitations preventing them from having rational expectations. Instead, these individuals use simple rules of behaviour. Behavioural Macroeconomics introduces rationality by allowing individuals to learn from their mistakes and to switch to the rules that perform better. It introduces the idea of endogenously generated animal spirits that drive the business cycle and are in turn influenced by it and applies this model to shed new light on a number of important issues. It analyses the role of fiscal policy in stabilizing the economy while maintaining debt sustainability, expands the model to include a banking sector and show how banks amplify the booms and busts and explains how animal spirits help to synchronize the business cycles across countries. The model set out in Behavioural Macroeconomics leads to very different policy implications from the mainstream macroeconomic model. It shows how policymakers have a responsibility to stabilize an otherwise unstable system.

Varieties of Capitalism Thomas Palley, Esteban Pérez Caldentey, Matías Vernengo, 2023-01-17 Over the past twenty years there has emerged a compelling new discourse on varieties of capitalism. That discourse has an appealing common sense which challenges the view there is no alternative to free market capitalism. The initial view had a microeconomic focus that made firms the fulcrum of analysis. It distinguished between liberal market and coordinated market economies. Subsequently there has emerged a second generation literature which adopts a macroeconomic perspective that emphasizes differences in drivers of growth. This book provides a collection of essays that engage those second generation concerns and questions.

New Thinking in Macroeconomics Jonathan M. Harris, Neva R. Goodwin, 2003 Presenting new and innovative perspectives on macroeconomics at the national and international levels brings together contributions on a wide range of topics including social, institutional and environmental perspectives, current issues of globalization, transitional economies, inequality, unemployment, national and international debt and the relationship of macroeconomic policies to the environment.

The Selected Essays of Assar Lindbeck: Macroeconomics and economic policy Assar Lindbeck, 1993 The first volume in a two volume set on macroeconomics, economic policy and the welfare state. This volume covers the development of the author's thought illustrating how his experience of economic policy making in Sweden has led him to form his current opinions.

The Macroeconomic Management of Foreign Aid Mr. Peter Isard, 2006-04-21 Since the adoption of the Millennium Development Goals (MDGs) in 2000, the challenge of reducing poverty around the world has been more prominent on the agenda of the international community. Relatively slow progress toward meeting the MDGs by the 2015 target date has added to the urgency of this effort. Two influential reports, The United Nations

Millennium Project Report the Sachs Report and the Commission for Africa Report the Blair Report envisage substantial increases in aid flows to poor countries especially to countries in sub Saharan Africa The International community sees increases in aid along with improvements in recipient policies and freer global trade as necessary for global prosperity and poverty reduction

New Perspectives in Monetary Macroeconomics Gary Dymksi, Robert Pollin, 1994 The defining characteristic of the monetary and financial systems of the capitalist economies since the 1960s has been persistent and fundamental change Some indicators of this change include the patterns toward financial deregulation historically high interest rates and increasingly frequent and severe bouts of financial instability The essays in this book build from the contributions of Hyman P Minsky whose theories in the areas of monetary macroeconomics unlike those of nearly all practitioners in this field have sought to understand the processes of structural change and instabilities as inherent features of capitalist economies New Perspectives in Monetary Macroeconomics includes essays that explore the nature of Keynesian uncertainty and the systematic sources of financial instability empirical essays that consider among other topics instability in the contemporary international economy the Latin American debt crisis the Great Depression and the political forces influencing central banks and essays in analytic history that consider the connections between Minsky's work and that of Schumpeter Marx and the Sraffian school The book's overall contribution advances thinking in four interrelated areas how financial factors play a central role in establishing the pace and direction of real investment how financial fragility emerges through endogenous market practices how money and credit are generated endogenously through financial market activity rather than simply through prior saving and central bank interventions and how financial markets are an important site of inter and intra class conflict especially as manifested through the policies of central banks and other important governmental institutions

Introduction to Macroeconomic Theory Jesper Jespersen, 2005 This is a textbook of macroeconomic theory and politics from a post Keynesian perspective The function of the macroeconomic system is explained in a straightforward way The text is deliberately designed to be simple and pedagogical and is supported by a number of illustrative diagrams Mathematics is reduced to an absolute minimum and put into separate text boxes

Rediscovering the Macroeconomic Roots of Financial Stability Policy C. E. V. Borio, 2011 The recent financial crisis has triggered a major rethink of analytical approaches and policy towards financial stability The crisis has encouraged a sharper focus on systemic risk the inclusion of a financial sector in macroeconomic models a shift from a microprudential to a macroprudential orientation in regulation and supervision and questions about whether price stability is a sufficient criterion to guide monetary policy In the process it has led to a rediscovery of the macroeconomic roots of financial instability This paper argues that this development is welcome but has not gone far enough To substantiate this conclusion the paper documents this analytical and policy journey before suggesting a way forward
