important of which is Warm Disease Latitudes and Longitudes Wen Re Jing Wei However even these great Ming and Qing dynasty doctors of warm disease on whose works this text is based only had partial insights their views were relatively fragmentary Warm Disease Theory is the first text to integrate the views of every school the first to undertake a comprehensive discussion of the foundations of warm disease theory and the clinical treatment of warm diseases It is in fact such a valuable source of theoretical and therapeutic information that it is often considered a modern classic The text is arranged in two sections The first introduces all the basic information about warm disease including its history disease causes pattern identification and general diagnostic and treatment methods The second section devotes a separate chapter to each of the different warm diseases It deals with the disease factors clinical manifestations pulses and treatments in the warm diseases of the four seasons including wind warmth spring warmth summerheat warmth damp warmth latent summerheat warmth autumn dryness and warm toxins In each of these warm diseases the disease concepts etiologies pathologies main points of diagnosis and treatment policies are discussed first then the patterns and treatments of their characteristic disease transformations are explained
