Lunar Calendar:

Civil Calendar and Lunar Calendar in Ancient Egypt Leo Depuydt, 1997 This investigation is concerned with ancient Egyptian calendars Its specific focus is one of the oldest problems of the study of these calendars the so called problem of the month names This work s main purpose is to suggest an explanation for the Brugsch phenomenon The Brugsch phenomenon is one of the two main aspects of the problem of the month names The other is the Gardiner phenomenon No new theory is presented for the Gardiner phenomenon As a problem the Brugsch phenomenon is slightly older than the Gardiner Phenomenon It has occupied center stage in the study of ancient Egyptian calendars since the early days of this endeavor In 1870 Heinrich Brugsch the great pioneer in this subject wrote about the phenomenon Here we encounter all at once the most curious contradiction Just recently Rolf Krauss has described the contradiction as still unsolved The Brugsch phenomenon concerns the indisputable fact that the last or twelfth month of the Egyptian civil year can be named as if it were the first Two month names are involved The first is wp rnpt Its meaning opener of the year refers to a beginning The second month name is mswt r birth of Re in hieroglyphic Egyptian Mesore in Aramaic Greek and Coptic Both can otherwise also refer to New Year s Day the quintessential calendrical beginning

Calendars in Antiquity Sacha Stern, 2012-09-06 Calendars were at the heart of ancient culture and society and were far more than just technical time keeping devices Calendars in Antiquity offers a comprehensive study of

the calendars of ancient Mesopotamia Egypt Persia Greece Rome Gaul and all other parts of the Mediterranean and the Near East from the origins up to and including Jewish and Christian calendars in late Antiquity In this volume Stern sheds light on the political context in which ancient calendars were designed and managed Set and controlled by political rulers calendars served as expressions of political power as mechanisms of social control and sometimes as assertions of political independence or even of sub culture and dissidence While ancient calendars varied widely they all shared a common history evolving on the whole from flexible lunar calendars to fixed solar schemes The Egyptian calendar played an important role in this process leading most notably to the institution of the Julian calendar in Rome the forerunner of our modern Gregorian calendar Stern argues that this common evolutionary trajectory was not the result of scientific or technical progress It was rather the result of major political and social changes that transformed the ancient world with the formation of the great Near Eastern empires and then the Hellenistic and Roman Empires from the first millennium BC to late Antiquity The institution of standard fixed calendars served the administrative needs of these great empires but also contributed to their cultural cohesion

Proceedings of the IIIT Lunar Calendar Conference Imad ad-Dean Ahmad,1998-01-01 This volume brings together both the elementary scientific facts that any lunar calendar formulation cannot ignore and a summary of the pressing scientific questions of particular interest to the Islamic calendar Scientific aspects of the problem are thoroughly reviewed without prejudicing the argument in purely Islamic juridical questions and differences The results are of great significance to both Islamic scholars and the general Muslim public The papers presented are of a high scientific quality and are followed by a unanimous statement of the professional astronomers on the scientific questions If these conclusions are followed the varying sets of conventions used by different Islamic populations can be made self consistent and free from scientific errors even if they still differ from each other This new edition allows the correction of errors in the first edition makes the style more uniform among the papers and improves the articles graphs and figures It aims to serve as an effective tool for addressing the calendrical issues that motivated the conference more than being merely a historical record A new Afterword summarizes refinements in the scientific issues that have taken place in the ten years since the conference many of which were prompted by the work presented here

Calendar and Community Sacha Stern,2001-10-04 Calendar and Community traces the development of the Jewish calendar from its origins until it reached in the tenth century CE its present form Drawing on a wide range of often neglected sources literary documentary epigraphic Jewish Graeco Roman and Christian it is the first comprehensive work to have been written on the subject It will be useful not only to historians and epigraphists for the interpretation of early Jewish datings but also as a historical study of early Judaism in its own right Its main theme is that the Jewish calendar evolved in the course of this period from considerable diversity with a variety of solar and lunar calendars to unity with the normative rabbinic calendar The unification of the calendar was one element in the unification of Jewish identity in later antiquity and the earlymedieval world

The Old Ways for Today Robert Sass,2019-01-09 Robert Sass has been studying and practicing Heathenry for twenty years The goal of this book is to educate Heathens on how to do Heathenry based on a historical perspective first How to do Sumble and Blot based on historical passages as well as educating Heathens on the various Germanic Heathen calendars that survived from the 8th 9th and 10th centuries Truly bringing the Old Ways into Heathenry based on solid research as opposed to just saying We do the Old Ways If this book does not have at least ten times as many historical sources Edda and Saga passages quoted than any other Asatru 101 book on the market I will be most disappointed I quote sources left and right Studying where our Ancestors left off is essential What Do You Know? Peggy O'Neill Fisher,2007-02 Each of the twenty seven intergenerational identity games in this book focuses on learning more about our faith particularly through our liturgical seasons and experiences The questions range from easy to challenging and can be used as icebreakers for review of content already learned as discussion starters to share basic information and for sacrament preparation The process is informative and enjoyable and through it the whole parish community will share lively discussion and renewed interest in the Catholic faith **Time and the Technosphere** José Argüelles,2002-08-03 A groundbreaking study that distinguishes the natural time of the cosmos from artificial mechanistic time Reveals September 11 as the signal of the end of artificial time according to the Law of Time Long awaited sequel to the author s bestselling book *The Mayan Factor* Explains the Great Calendar Change of 2004 and its enormous potential for the future of humanity In *Time and the Technosphere* Jos Arg elles presents a groundbreaking study that distinguishes the natural time of the cosmos from the artificial mechanistic time under which we currently live Arg elles defines the actual nature of time as the frequency of synchronization Applying this Law of Time to an understanding of the entire system of life on Earth he shows that in order to not destroy Earth s ability to sustain life we must change our definition of time and adopt a natural harmonic calendar based on the 13 moon 28 day cycle Until the creation of the Gregorian calendar and the 60 minute hour most of humanity lived by the 28 day cycle of natural time The adoption of artificial time has subjected us to a 12 60 time frequency that governs the entire global industrialized civilization the technosphere With the collapse of the Twin Towers on September 11 a fissure was created in this artificial technosphere opening up the noosphere Earth s mental envelope Humanity has a golden opportunity to leave the strife of the past and enter a time of peace by adopting a harmonious natural calendar that will repair the damages caused by the irregular tempo of technospheric time Our last best chance to adopt this natural time and step into the bright new future promised by the galactic shift of 2012 is the Great Calendar Change of 2004 a new discovery based on the author s mathematical research into the Mayan calendar first begun in his landmark work *The Mayan Factor* In *Time and the Technosphere* Arg elles reveals the clear distinction between third dimensional astronomical time and the fourth dimensional synchronic order of the Law of Time which holds enormous potential for the future of humanity **The Secret System** Gerhard Larsson,1973 **Planets & Moons** Rishikesh Jaiswal,2025-04-19 The worlds beyond our own have captivated human imagination for centuries From

the ancient astronomers who tracked the movements of celestial bodies to the modern space probes exploring distant moons our fascination with planets and their companions has only deepened with time This book *Planets and Moons* invites you on an immersive journey through the solar system and beyond uncovering the extraordinary diversity mysteries and dynamic forces that shape these celestial spheres Within these pages you will explore the planets in detail each with its unique characteristics weather systems and histories of formation You will travel to their moons some of which may harbour the conditions for life We will trace the scientific breakthroughs that revolutionized our understanding from Galileo's telescope to modern day robotic explorers sending back breath taking images from alien landscapes What makes this book *Planets and Moons* stand out is its depth and clarity Instead of simply skimming through facts and figures this book dives deeper weaving together science history and discovery in a way that is both informative and engaging Every concept is presented in clear accessible language ensuring that even complex ideas can be grasped without difficulty While mathematical principles are fundamental to planetary science this book focuses on the big picture introducing only the most essential formulas with practical examples to enhance understanding Our aim is to provide a comprehensive yet approachable guide one that not only educates but also sparks curiosity and wonder Whether you're an amateur astronomer a student of the cosmos or simply someone who has looked up at the night sky and wondered about the worlds beyond this book is for you So let's embark on this journey together traveling through the vast and fascinating realm of planets and moons where every world has a story to tell

Calendars and Years John M. Steele, 2007-10-08 Dates form the backbone of written history But where do these dates come from Many different calendars were used in the ancient world Some of these calendars were based upon observations or calculations of regular astronomical phenomena such as the first sighting of the new moon crescent that defined the beginning of the month in many calendars while others incorporated schematic simplifications of these phenomena such as the 360 day year used in early Mesopotamian administrative practices in order to simplify accounting procedures Historians frequently use handbooks and tables for converting dates in ancient calendars into the familiar BC AD calendar that we use today But very few historians understand how these tables have come about or what assumptions have been made in their construction The seven papers in this volume provide an answer to the question what do we know about the operation of calendars in the ancient world and just as importantly how do we know it Topics covered include the ancient and modern history of the Egyptian 365 day calendar astronomical and administrative calendars in ancient Mesopotamia and the development of astronomical calendars in ancient Greece This book will be of interest to ancient historians historians of science astronomers who use early astronomical records and anyone with an interest in calendars and their development

Couch, 2017-09-08 According to Carl J Couch the

history of human society is one of successive sometimes overlapping information technologies used to process the various symbolic representations that inform social contexts Unlike earlier media theorists who ignored social context in order to concentrate on the information technologies themselves Couch implements a consistent theory of interpersonal and intergroup relations to describe the essential interface between information technologies and the social contexts in which they are used Couch emphasizes the formative capacities of information technologies across historical epochs and cultures and places them within the major institutional relations of various societies He views social orders as reflexively shaped by the information technologies that participants use and as susceptible to mass brutality and oppression due to oligarchic control though he hopes technology will remain humane The original edition of this manuscript was nearly complete at the time of Couch s death and was brought to completion by two of his closest associates Now after two decades during which its impact is indisputable it has been updated for a new generation of students and scholars Additions include discussions on books in the digital age social media mobile telephones recordings participatory culture and more
