MANAGERIAL ECONOMICS AND FINANCIAL ACCOUNTING M. KASI REDDY, S. SARASWATHI, 2007-12-24 This text presents an accessible introduction to techniques and applications of economic analysis and financial accounting as a method for approaching real life business problems for managerial decision making in a logical manner. It focusses on the essential skills needed to formulate business policies that help gain a competitive edge in today's work environment. The book discusses the basic concepts, terminology and methods that eventually allow students to interpret, analyse and evaluate actual corporate financial statements. It covers the major areas of managerial economics and financial accounting such as the theory of the firm, the demand theory and forecasting, the production and cost theory and estimation, the market structure and pricing, investment analysis, accountancy and different forms of business organisations. The book includes numerous examples, problems, self assessment tests as well as review questions at the end of each chapter to aid in working out solutions to business problems. The book will be particularly suitable for courses in Managerial Economics and Financial Accounting as part of an engineering degree education at undergraduate level where the students have no previous background in economic and financial analysis. It will also be immensely useful for M B A M Com and C A students, business executives and administrators who need to learn the application of economic theory to realistic business situations.
