

PART I: SAMPLE MANAGERIAL ACCOUNTING CASE STUDIES

CASE 1: COST CLASSIFICATIONS

Roger is a student at Tacoma Community College and needs to supplement his income while going to school. Roger buys a new car and decides to be an Uber driver. The hours are flexible and the pay is reasonably good allowing Roger to go to the school and work. Roger didn't drive much during March as he was on spring break. In addition, Roger drove less during May and December because he was studying for final exams. Uber requires Roger to pay a commission of 20 percent on all gross receipts.

Roger buys a new Hyundai Elantra SE for \$25,000. Roger thinks the car will last four years and will have a residual value of \$5,000. Roger plans to depreciate the car using straight-line depreciation. The car will be used 100 % for business.

Roger keeps track of his expenses in three categories. Those categories are insurance on the car, fuel costs, and other costs. The other category includes fixing of flat tires, oil changes, speeding tickets, car washes/detailing, cell phone with data, and auto maintenance.

Roger ignores federal income taxes as a business expense and self-employment taxes as they are not reported as a business expense on his tax return. You are to ignore these costs in your computations. Roger's gross receipts for the year were \$62,500.

Expenses paid with cash or credit card during the last year are as follows:

Auto Insurance..... \$4,439 Fuel Expense..... \$6,294

Other	Miles Driven	Total Other Cost
January	2,817	\$ 460
February	3,453	529
March	1,255	340
April	4,892	690
May	1,629	400
June	5,478	718
July	5,381	706
August	6,933	749
September	3,983	569
October	3,630	542
November	4,762	662
December	<u>3,387</u>	<u>501</u>
Total	47,600	

$$\begin{aligned}
 749 &= \text{fixed costs} + (0.072 \times 47,600) \\
 749 &= \text{fixed costs} + 494.35 \\
 -494.35 &= \text{fixed costs} \\
 \hline
 254.65
 \end{aligned}$$

Required:

- Using the high-low method determine the portion of "Other" costs that are fixed (rounded to the nearest dollar) and the variable cost per mile (rounded three decimal places).
- Looking at **all costs**, what are the total variable cost per mile and the total fixed costs? Include cash and noncash annual expenditures in your analysis.
- Using the results of #2 above, if Roger drives 60,000 miles next year with an estimated gross receipts of \$78,782, what is the estimated total costs and average cost per mile?
- Prepare a contribution margin income statement for this year and next year. Calculate your income per mile. Explain your results in detail.
- Research online any taxes that might be due the Washington State Department of Revenue by Uber drivers. Explain how the tax is calculated.
