The mind in Ayurveda Bruno Renzi,2020-04-22 In the tradition of Vedic Knowledge Consciousness is not a dimension consequent to the peculiar phylogenetic development of the human being nor is it a configuration that emerges in relation to the organization of the Central Nervous System but it is considered on the contrary a basic dimension of nature It is an original nucleus at the base of existence a vast and unlimited unified field that originates and pervades every phenomenon expressed in nature Maharishi Maesh Yogi 1966 Experience teaches us that the Self has already existed for a long time and is more ancient than the ego which represents the secret spiritus rector or guiding spirit of our destiny The Self as such does not become conscious eo ipso on its own but it has always been taught if it is taught at all by a tradition by knowledge Therefore like every other archetype it cannot be located confined within the area of ego consciousness but it behaves as if it were an atmosphere surrounding man without well defined spatial or temporal limits C G Jung Within the vision of the mind in Vedic Science the author highlights the importance of crucial preconceptional quantum factors that make up the olographic memory that morphogenetic field which at the level of DNA determines temperamental phenotypical expression and the existential project of the individual within a well defined flow of consciousness
