[Learning After Effects Expressions](#) ,2014 Even if you re not comfortable with scripting or coding you may still want to take a look at expressions They are like little scripts that trigger changes to layer properties and they can save you time make your work more flexible and open up new creative possibilities In this course motion graphic

designer Angie Taylor shows you how to make Adobe After Effects expressions work for you starting with building expressions with the pick whip Then she introduces JavaScript based math expressions which allow you to adjust timing and movement and her favorite no brainer expressions such as property linking and connecting camera focus to layers Plus discover how to react to sound play with color format text and link 2D and 3D properties *High-Level Adaptation and Aftereffects* Rocco Palumbo, Stefania D'Ascenzo, Luca Tommasi, 2017-04-28 Aftereffects generally occur after a prolonged exposure adaptation to a first stimulus possessing one given property followed by presentation of a stimulus bearing a neutral value of that property The aftereffect consists in a change in appearance of the neutral stimulus following the adapter compared to the appearance of the neutral stimulus when it is perceived without any previous exposure to the adapter The transient phenomena of perceptual aftereffects are believed to depend on the activation of neuron populations that respond selectively to a given property of the stimuli Studying how adaptation occurs which stimulus properties are sensitive to it which timings are necessary whether individual differences modulate its occurrence has thus become an indirect way to probe the plasticity of sensory functions in the nervous system recently extending to more cognitive and representational aspects of neural coding In the last two decades indeed it has been demonstrated that aftereffects occur not only for low level properties of stimuli such as motion color or orientation but also for high level properties Many studies have proven that high level properties of the stimuli e g gender identity ethnicity or age of a face or a voice are sensitive to this phenomenon It has been shown for example that the prolonged exposure to a female or male face produces a gender misperception in the opposite direction when an androgynous face is shown after the adapter Furthermore recent studies have also shown that aftereffects are not strictly contingent upon the physical features that make up stimuli but they seem to run across the high level properties subjects are adapted to These evidences are supported by cross category adaptation studies which underlie how aftereffects occur even across stimuli that do not share physical features e g bodies and faces but that instead share common higher level properties such as gender Given the growing body of research focused on adaptation and aftereffects in high level perception at the boundaries with perceptual learning attention and cognition the purpose of this topic is to provide a picture of the state of the art relative to the specific phenomena of adaptation in high level perceptual processing

Adobe After Effects Scripting Guide Nathan CLARK, 2018-12-07 This Book Is To Learn A script is a series of commands that tells an application to perform a series of operations You can use scripts in most Adobe applications to automate repetitive tasks perform complex calculations and even use some functionality not directly exposed through the graphical user interface For example you can direct After Effects to reorder the layers in a composition find and replace source text in text layers or send an e mail message when rendering is complete Although both the After Effects expressions language and the After Effects ExtendScript scripting language are based on JavaScript the expressions features and scripting features of After Effects are separate and distinct Expressions cannot access information from scripts such as variables and functions

Whereas a script tells an application to do something an expression says that a property is something However because the After Effects expression language and ExtendScript are both based on JavaScript familiarity with either one is very helpful in understanding the other The heart of a scriptable application is the object model When you use Adobe After Effects you create projects compositions and render queue items along with all of the elements that they contain footage images solids layers masks effects and properties Each of these items in scripting terms is an object This guide describes the ExtendScript objects that have been defined for After Effects projects

Facial Expression Recognition A W Young,2016-04-14 In the World Library of Psychologists series international experts themselves present career long collections of what they judge to be their finest pieces extracts from books key articles salient research findings and their major theoretical and practical contributions This volume of self selected papers recognises Andy Young s major contribution to the study of face perception for which he received the BPS Lifetime Achievement Award in 2013 Focusing on his work in facial expression recognition a specially written introduction gives an overview of his work and contextualises the selection in relation to developments in the field during this time Divided into five distinct sections the book covers work on both theoretical and experimental approaches to facial expression recognition neuropsychology functional brain imaging and applications of research This book will be of great interest to students and researchers of cognitive psychology or neuropsychology interested in face perception It will also appeal to those with an interest in the highly varied applications of the research and provide insight into a number of clinical disorders
