K-12 Education Finance Anthony Rolle,2024-02-02 Education finance researchers tend to organize their thoughts on important issues by considering one of the four foundational perspectives equity efficiency liberty and adequacy The six essays presented in this special edition of the Peabody Journal of Education base their work within the context of the four pillars and present new directions for future research While some of the articles isolate a concept for closer scrutiny others draw attention to more interactive aspects of the pillars in question Each article leaves the reader with important information and insightful questions about both the usage and efficacy of education finance policies

Education, Justice & Democracy Danielle Allen,Rob Reich,2022-12-22 Education is a contested topic and not just politically For years scholars have approached it from two different points of view one empirical focused on explanations for student and school success and failure and the other philosophical focused on education s value and purpose within the larger society Rarely have these separate approaches been brought into the same conversation Education Justice and Democracy does just that offering an intensive discussion by highly respected scholars across empirical and philosophical disciplines The contributors explore how the institutions and practices of education can support democracy by creating the conditions for equal citizenship and egalitarian empowerment and how they can advance justice by securing social mobility and cultivating the talents and interests of every individual Then the authors evaluate constraints on achieving the goals of democracy and justice in the educational arena and identify strategies that we can employ to work through or around those constraints More than a thorough compendium on a timely and contested topic Education Justice and Democracy exhibits an entirely new more deeply composed way of thinking about education as a whole and its importance to a good society

Market Movements Thomas C. Pedroni,2013-01-11 Winner of the 2009 Critics Choice Book Award of the American Educational Studies Association AESA Through careful ethnographic research Market Movements represents community leaders school officials and most importantly African American working class families who have used vouchers as a means of removing their children from public schools they deemed unacceptable The book works to discern the overlaps and tensions

between the educational visions of African American voucher families and those of powerful conservative educational forces in U S society which purport to be allied with them To the extent that there are points of divergence with the educational right and points of convergence with educational progressives this book provides a hopeful message and a practical vision It seeks to accomplish some of the critical empirical and conceptual groundwork that is necessary in order to renew the increasingly fractious relations between those social actors teachers communities of color critical researchers and labor unions most likely to defend and expand previous social democratic victories

Multilevel Analysis for Applied Research Robert Bickel,2007-03-19 This book provides a uniquely accessible introduction to multilevel modeling a powerful tool for analyzing relationships between an individual level dependent variable such as student reading achievement and individual level and contextual explanatory factors such as gender and neighborhood quality Helping readers build on the statistical techniques they already know Robert Bickel emphasizes the parallels with more familiar regression models shows how to do multilevel modeling using SPSS and demonstrates how to interpret the results He discusses the strengths and limitations of multilevel analysis and explains specific circumstances in which it offers or does not offer methodological advantages over more traditional techniques Over 300 dataset examples from research on educational achievement income attainment voting behavior and other timely issues are presented in numbered procedural steps

The Service Productivity and Quality Challenge P.T. Harker,2012-12-06 3 While all of these explanations seem to have merit there is one dominant reason why the percentage of GDP and employment dedicated to services has continued to increase low productivity According to Baumol s cost disease hypothesis Baumol Blackman and Wolff 1991 the growth in services is actually an illusion The fact is that service sector productivity is improving slower than that of manufacturing and thus it seems as if we are consuming more services in nominal terms However in real terms we are consuming slightly less services That is the increase in the service sector is caused by low productivity relative to manufacturing The implication of Baumol s cost disease is the following Assuming historical productivity increases for manufacturing agriCulture education and health care Baumol 1992 shows that the U S can triple its output in all sectors within 50 years However due to the higher productivity level for manufacturing and agriculture it will take substantially more employment in services to achieve this increase in output To put this argument in perspective simply roll back the clock 100 years or so and replace the words manufacturing with agriculture and services with manufacturing The phenomenal growth in agricultural productivity versus manufacturing caused the employment levels in agriculture in the U S to decrease rapidly while producing a truly unbelievable amount of food It is the low productivity of services that is the real culprit in its growth of GDP and employment share

The Heart and Mind in Teaching Alyssa Magee Lowery,William Hayes,2014-07-30 The Heart and Mind in Teaching Pedagogical Styles Through the Ages provides an important historical context for an issue confronting every American teacher administrator student parent and citizen As the art of teaching is rapidly replaced by formulas clinical studies and one size fits all scientific pedagogy it is important to ask

the question How did we get here Authors Alyssa Magee Lowery and William Hayes trace the history of teaching from Greek philosophy to twenty first century educational issues in an effort to provide some perspective in the long art versus science debate ultimately finding that the two components may be able to coexist peacefully *35th Anniversary Retrospective* Konstantinos Tatsiramos, Solomon W. Polachek, 2012-09-25 To commemorate Research in Labor Economics s 35th anniversary this retrospective edition contains 20 of the most influential Research in Labor Economics articles along with new introductory prefatory updates written by the original authors **The Public School Advantage** Christopher A. Lubienski, Sarah Theule Lubienski, 2013-11-07 Nearly the whole of America s partisan politics centers on a single question Can markets solve our social problems And for years this question has played out ferociously in the debates about how we should educate our children From the growth of vouchers and charter schools to the implementation of No Child Left Behind policy makers have increasingly turned to market based models to help improve our schools believing that private institutions because they are competitively driven are better than public ones With *The Public School Advantage* Christopher A and Sarah Theule Lubienski offer powerful evidence to undercut this belief showing that public schools in fact outperform private ones For decades research showing that students at private schools perform better than students at public ones has been used to promote the benefits of the private sector in education including vouchers and charter schools but much of these data are now nearly half a century old Drawing on two recent large scale and nationally representative databases the Lubienskis show that any benefit seen in private school performance now is more than explained by demographics Private schools have higher scores not because they are better institutions but because their students largely come from more privileged backgrounds that offer greater educational support After correcting for demographics the Lubienskis go on to show that gains in student achievement at public schools are at least as great and often greater than those at private ones Even more surprising they show that the very mechanism that market based reformers champion autonomy may be the crucial factor that prevents private schools from performing better Alternatively those practices that these reformers castigate such as teacher certification and professional reforms of curriculum and instruction turn out to have a significant effect on school improvement Despite our politics we all agree on the fundamental fact education deserves our utmost care *The Public School Advantage* offers exactly that By examining schools within the diversity of populations in which they actually operate it provides not ideologies but facts And the facts say it clearly education is better off when provided for the public by the public [Damned If I Do...Damned If I Don't. Reflections of a Conservative Atheist](#) Frank Cress, 2005-11 What is a conservative atheist Isn t that an oxymoron Well Frank Cress thinks that it is a valid position and in fact thinks he can convince you that the conservative atheist position is most rational of all Come along for discussion on a wide variety of subjects ranging from abortion to gay rights from raising atheist children to software development techniques If you are an atheist with socially conservative values you will probably find most of your thoughts expressed here maybe even for the first
