

American Multiculturalism vs. French Ethno-pluralism: The Debate over Arab and Muslim Assimilation

Lanouar Ben Hafsa
University of Tunis, Tunisia

Abstract

Although they have become more visible across the Western world, Arabs and Muslims remain inadequately described and poorly misunderstood. In the United States, inasmuch as in France, despite their expanding numbers and their growing involvement into the decision making process, both groups still suffer from widespread prejudice, especially the negative image conveyed about them in the media and within some political circles.

Until the 1970s, Arab and Muslim immigrants had been a neglected dimension in either American or French ethnic and religious history. But the rise in the number of such foreign-born residents in both countries added to the growing fear over the upsurge of Islamic fundamentalism, and generated considerable interest and public debate on how well these groups would assimilate into the mainstream culture of their host societies and fit within a pre-established order.

This paper not only aims to cast a fresh and objective look into how American and French citizens of Arab and Muslim descent adjust to their new environment, but also attempts to provide some insights into how the United States and France accommodate Islam, as both nations, because of their different immigration histories and their relatively diverging ideologies, do not have a communality of views on how society should be structured and organized.

Two elements have been decisive for such a study: first, my experience in France as a postgraduate student at Sorbonne University, second, the research I conducted in 2004 on Arab Americans as Senior Fulbright at the Center for Arab American Studies, at the University of Michigan-Dearborn. Both encounters not only helped me draw a number of conclusions regarding the respective experiences of two communities, united by common historical and cultural ties, but so different as to the way they adapt to their host societies. They especially enhanced my understanding of what it really means to be Arab or Muslim in France and in the United States.

To support the research's central point, a number of questions will be addressed: Are Arab-Americans in general and American Muslims in particular unwilling to assimilate? Is Islam inherently incompatible with Western and Judeo-Christian values? Should policymakers see Islam as the enemy of the West? Should the prevalent anti-Americanism in the Arab and Muslim world be understood within the broader context of "clash of civilizations" or "war of religions", as stressed

Secularism, Assimilation and the Crisis of Multiculturalism Yolande Jansen, 2025-10-01 This remarkable study develops a theoretical critique of contemporary discourses on secularism and assimilation arguing that the perspective of assimilating distinct religious minorities by incorporating them into a secular and supposedly neutral public sphere may be self subverting To flesh out this insight Jansen draws on the paradoxes of assimilation as experienced by the French Jews in the late 19th century through a contextualised reading of Proust's *In Search of Lost Time* She proposes a dynamic critical multiculturalism as an alternative to discourses focusing on secularism assimilation and integration Us, Them, and Others Elke Winter, 2011-10-01 How do countries come to view themselves as being multicultural *Us Them and Others* presents a dynamic new model for understanding pluralism based on the triangular relationship between three groups the national majority historically recognized minorities and diverse immigrant bodies Elke Winter's research illustrates how compromise between unequal groups is rendered meaningful through confrontation with real or imagined outsiders *Us Them and Others* sheds new light on the astonishing resilience of Canadian multiculturalism in the late 1990s when multicultural policies in other countries had already come under heavy attack Winter draws on analyses of English language newspaper discourses and a sociological framework to connect discourses of pan Canadian multicultural identity to representations of Quebecois nationalism immigrant groups First Nations and the United States Taking inspiration from the Canadian experience *Us Them and Others* is an enticing examination of national identity and pluralist group formation in diverse societies **The SAGE Handbook of Cultural Analysis** Tony Bennett, John Frow, 2008-03-26 A genuine one stop reference point for the many many differing strands of cultural analysis This isn't just one contender among many for the title of best multidisciplinary overview this is a true heavyweight Matt Hills Cardiff University An achievement and a delight both compelling and useful Beverley Skeggs Goldsmiths University of London With the cultural turn the concept of culture has assumed enormous importance in our understanding of the interrelations between social political and economic structures patterns of everyday interaction and systems of meaning making In *The SAGE Handbook of Cultural Analysis* the leading figures in their fields explore the implications of this paradigm shift Part I looks at the major disciplines of knowledge in the humanities and social sciences asking how they have been reshaped by the cultural turn and how they have elaborated distinctive new objects of knowledge Parts II and III examine the questions arising from a practice of analysis in which the researcher is drawn reflexively into the object of study and in which methodological frameworks are rarely given in advance Addressed to academics and advanced students in all fields of the social sciences and humanities *The SAGE Handbook of Cultural Analysis* is at once a synthesis of advances in the field with a comprehensive coverage of the scholarly literature and a collection of original and provocative essays by some of the brightest intellectuals of our time **European Memory in Populism** Chiara De Cesari, Ayhan Kaya, 2019-10-08 *European Memory in Populism* explores the links between memory and

Stasiulis,2015-12-22 Multiculturalism is a concept that has been stretched to include a variety of political conditions mainly in countries that have liberal democratic political systems and traditions In this North South comparison we illuminate remedies pursued by governments and various political interests to address the binary Tensions of culture and rights may not be the same everywhere An interesting point of comparison is in the treatment of liberalism often assumed in the global North to be the universal norms to be defended whereas in the global South liberalism itself may be viewed as the problem Colonial histories are fraught with discriminatory legislation aimed at accommodating indigenous populations often a trade off for more structural redistributive justice through for example land reform In Africa for example the codification of customary law has reinforced misogynistic and static interpretations of African culture This book will show how varied and complex the embodiment of multiculturalism as a political practice or policy discourse in different political contexts can be and how often the outcome of multicultural discourses creates a binary between culture and universal human rights The aim of this book is to grapple with dislodging this binary This book was published as a special issue of *Politikon* **Library of Congress Subject Headings** Library of Congress,Library of Congress. Discourse and Power in a Multilingual World Adrian Blackledge, 2005-09-16 In *Discourse and Power in a Multilingual World* the discourse of politicians and policy makers in Britain links languages other than English and therefore speakers of these languages with civil disorder and threats to democracy citizenship and nationhood These powerful arguments travel along chains of discourse until they gain the legitimacy of the state and are inscribed in law The particular focus of this volume is on discourse linking race riots in England in 2001 with the Nationality Immigration and Asylum Act 2002 which extended legislation to test the English language proficiency of British citizenship applicants Adrian Blackledge develops a theoretical and methodological framework which draws on critical discourse analysis to reveal the linguistic character of social and cultural processes and structures on Bakhtin s notion of the dialogic nature of discourse to demonstrate how voices progressively gain authority and on Bourdieu s model of symbolic domination to illuminate the way in which linguistic minority speakers may be complicit in the misrecognition or valorisation of the dominant language
