Homoeopathy for the Home Prescriber Jan Owen,2003 **The Homeopathic Physician's Quick Prescriber** K. D. Kanodia,2007 A consolidation of the various experiences of the physicians who dedicated themselves for the cause of Homeopathic science *Therapeutic Guide for Quick Prescribing* S. R. Kohli,Dayal,2003 This book is being placed in the hands of the physicians and lovers of Homeopathy after a monumental labour of over 24 years When a doctor treats a patient he endeavours to render the best possible service and also wants to conserve his own time This book will be of immense help for the said objectives Homoeopathy Henrietta Wells,2002 Homoeopathy shows how this long standing practice can gently stimulate the body's natural healing mechanism providing a safe alternative to the side effects and toxicity of conventional medicine The book offers a very practical approach to using homoeopathic remedies and includes step by step instructions for treating everyday ailments such as coughs colds fevers flu and even hangovers It also addresses a number of topical and controversial issues such as vaccination malaria prevention and the risks of DVT deep vein thrombosis when flying Munyon's Homeopathic Home Remedies Munyon Homeopathic Home Remedy Co,189? **Modalities of Homoeopathic Medicines** Ahmad Sayeed,2003 This book covers in details the modalities of homoeopathic medicines A quick reference for aggravation and amelioration for busy homoeopathic practitioners for prescription An easy guide for students and followers *The Prescriber* John Clarke,2013-08-29 THIS work is designed primarily for the beginner in homoeopathic practice as a handy book of reference to enable him to find speedily the most suitable remedy for a given case with hints as to the best attenuation to employ and how frequently to repeat The second edition of THE PRESCRIBER comprising double the number of copies issued in the first has naturally taken a longer time to exhaust This has afforded the author an opportunity of making many annotations in his interleaved copies and the most important of these have been embodied in the present edition Several entirely new headings have been added and in deference to suggestions an attempt has been made to classify the large chapters Cough and Headache The difficulty in satisfactorily classifying these or any

other disorders which have many varieties lies in the fact that the divisions are necessarily more or less artificial and partial. For instance spasmodic may be taken to describe one kind of cough dry may describe another class hacking another and so on but many medicines will cause coughs having all these characteristics and consequently it will be of little use to classify the same medicine under each of the heads whilst it would be misleading to place it only under one. To meet this difficulty the leading features in the symptoms of the drugs mentioned in these two chapters have been italicized so that they will more readily catch the eye and under subsidiary headings peculiar conditions of the diseases have been added with their corresponding drugs so that they may be more easily found. In order to enable those who use the book to avoid the practice of alternating medicines greater precision in differentiating their indications has been aimed at. Where formerly two remedies were advised to be given in alternation the particular indications when to give the one and when the other are now supplied. The indications for the remedies generally will be found to be more symptomatic and less pathological than formerly. Medicines have no regard to the names of diseases either pathological or nosological but only to the symptoms of each individual patient. A repertorial work whose basis of arrangement is clinical or nosological has in strict logic no raison d'être in Homeopathy but practically it has a by no means unimportant place. Names of diseases correspond to well defined groups of symptoms which find analogous groups in the symptom record of the various medicines. A clinical repertory like THE PRESCRIBER shows at a glance what these medicines are and how they are to be distinguished from each other. If the most similar remedy is not found under any of the medicines named recourse must be had to the Materia Medica itself and the Repertories of its Symptomatology. THE PRESCRIBER IS not intended to be a substitute for a knowledge of the Materia Medica but only as a help to the successful use of it. For the benefit of non professional readers who may find the book of service when professional advice is not available the Glossary compiled by the late Mr HENRI HUSSON for the second edition has been retained.
