

HOT TUB MAINTENANCE

1. WATER TESTING

The water must be regularly tested to ensure pH, alkalinity, sanitizer, and water hardness are properly balanced.

2. PH LEVEL

The pH of the water should be maintained between 7.2 and 7.8. This optimizes the performance of the sanitizer.

3. SANITIZATION

Chemicals must be added to sanitize the water. Chlorine is the preferred option and should be maintained at 1-3 ppm.

4. SHOCK TREATMENT

Shock treatment should be performed every 2 weeks or after a period of intense use to remove stubborn contaminants.

5. FILTERS

Hot tub filters should be regularly cleaned and periodically replaced as per manufacturer's guidelines - refer to user manual.

6. CLEANING

The hot tub should be regularly cleaned to remove grime, maintain cleanliness, and ensure proper working order.

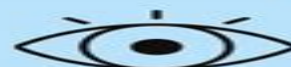

7. WATER REPLACEMENT

The water in a hot tub should be periodically replaced. In general, a change should be performed every 3-4 months, for cleanliness.

8. INSPECTION

Regularly inspect the sauna for signs of defect or damage. Catching a problem early helps avoid serious consequences.
