Kulkarni, Patrick Siarry, 2021-09-01 At the heart of the optimization domain are mathematical modeling of the problem and the solution methodologies The problems are becoming larger and with growing complexity Such problems are becoming cumbersome when handled by traditional optimization methods This has motivated researchers to resort to artificial intelligence AI based nature inspired solution methodologies or algorithms The Handbook of AI based Metaheuristics provides a wide ranging reference to the theoretical and mathematical formulations of metaheuristics including bio inspired swarm based socio cultural and physics based methods or algorithms their testing and validation along with detailed illustrative solutions and applications and newly devised metaheuristic algorithms This will be a valuable reference for researchers in industry and academia as well as for all Master s and PhD students working in the metaheuristics and applications domains *Pseudo-retranslation* Mehmet Yildiz, 2024-08-16 This book presents pseudo retranslations as a new phenomenon of translational intertextuality revealing how pseudo retranslations establish large networks of intertextuality across academic works how academic authors have recourse to this procedure as they create their academic texts and how pseudo retranslations contribute to the dissemination of translation distorted scholarly knowledge and lead to epistemically polluted academic ecosystems Pseudo retranslation can be defined as an academic author s partial or complete exploitation of another academic author s translation and presenting it as a retranslation of the source text This phenomenon first documented in Yildiz 2021 arises from academic authors failure to refer to or translate primary sources particularly in English Since there occurs no actual retranslation process this procedure is called pseudo retranslation Using a range of academic texts from the Turkish context as case studies the author presents the integral constituents of this phenomenon and the behavioural patterns of its renderers This book will be of particular interest to academics and postgraduates in the field of translation studies and corpus linguistics **Civilization and Barbarism** Graeme R. Newman, 2020-03-01 Challenges the established corrections paradigm and argues for replacing mass incarceration with a viable and more humane alternative The practice of mass incarceration has come under increasing criticism by criminologists and corrections experts who nevertheless find themselves at a loss when it comes to offering credible practical and humane alternatives In Civilization and Barbarism Graeme R Newman argues this impasse has arisen from a refusal to confront the original essence of punishment namely that in some sense it must be painful He begins with an exposition of the traditional philosophical justifications for punishment and then provides a history of criminal punishment He shows how over time the West abandoned short term corporal punishment in favor of longer term incarceration justifying a massive bureaucratic prison complex as scientific and civilized Newman compels the reader to confront the biases embedded in this model and the impossibility of defending prisons as a civilized form of punishment A groundbreaking work that challenges the received wisdom of corrections Civilization and Barbarism asks readers to reconsider moderate corporal

punishment as an alternative to prison and for the most serious offenders forms of incapacitation without prison The book also features two helpful appendixes a list of debating points with common criticisms and their rebuttals and a chronology of civilized punishments Newman s book is a monumental piece of scholarship that presents a controversial set of propositions about how punishment in the future should be administered Readers will likely learn many new things about the history of punishment and be challenged about their current views of just punishment for wrongdoing Martha J Smith coeditor of Theory for Practice in Situational Crime Prevention
