Introduction

Making critical sense of human resource management in a globalized world

Jawad Syed and Robin Kramar

Welcome to the first edition of *Human Resource Management in a Global Context: A Critical Approach*. The book has been written with the aim of developing our understanding and practice of human resource management (HRM) in an increasingly globalized world of work. The book uses a critical lens to develop an approach to HRM that is not only business-focused but also context-sensitive and socially responsible – we will explain our rationale for this below.

The emergence of HRM in the 1980s was accompanied by a sustained theoretical assault on its pretensions, highlighting the gap between the rhetoric of HRM and the reality, which was focused on impersonal economic rationalism. The reconstruction of the employment relationship as a singularly individual market exchange did not go uncontested in management education. However, whereas the proponents of HRM once felt the need to engage and respond to critique, the field now seems to have narrowed as the major concerns relate merely to strategic ‘fit’ and identifying mechanisms to facilitate ‘high-commitment’ and ‘high-performance’ organizations.

We consider the overemphasis of HRM on strategic performance to be problematic in view of the considerable gap between the policy and practice of strategic HRM. Vaughan (1994) argues that although organizational mission statements usually hold that employees are their most important asset, organizational reality is characterized by impersonal economic rationalism. Wilmott (1993) asserts that the rhetoric of HRM tends to turn employees into ‘willing slaves’ who negate their own interests, assuming the organization will take care of them. Seen from this angle, HRM’s unitary rhetoric may compromise the individual and collective needs of employees and may instill an HRM culture

Managing Human Resources in Africa Chima Mordi, Hakeem Adeniyi Ajonbadi, Olatunji David Adekoya, Toyin Ajibade Adisa, 2023-07-24 Over the decades academic literature has too often neglected the complexities and diversity of the African continent and the challenges faced by both multinational companies working across Africa and domestic African companies particularly in the field of human resources. This edited collection has been compiled with the aim of developing our understanding and practice of HRM in an African context within an increasingly global work milieu. Chapters focus on different African countries and are underpinned by a critical approach to HRM which goes beyond focussing on the business cases but considers the sensitivity of the national context. The authors will draw on various types of research conceptual theoretical and empirical and incorporate contextual issues such as technology politics culture and economics to supplement the readers insights into the current state of human resource management in African countries. By highlighting theoretical underpinnings and emphasising the practical relevance of HR issues this proposed book will offer an insightful guide for students and scholars interested in HR and

management in developing economies *Critical Issues in Human Resource Management* Ian Roper, Rea Prouska, Uracha Chatrakul Na Ayudhya, 2010-11-11 *Critical Issues in Human Resource Management* will enable all HR students to take a critical approach to HR issues. Outlining the influences and shapers of HR strategy including ethics, managing in different national contexts, employment relations, politics, governance and finance, this book provides students with a full understanding of the complexities of HRM strategy and what the implications of these are. There is also a crucial discussion of critical issues in the processes and practice of HRM including the dilemmas of onshoring and offshoring, gender equality, challenging institutional racism and disability discrimination in the modern workplace to enable readers to think deeply and critically about these issues. *Critical Issues in Human Resource Management* also includes discussion of the application of HRM in different sectors such as manufacturing, the public sector, the private sector and not-for-profit organizations. This will enable HR students to examine HR practices in specific industries and to think about how issues might be dealt with differently in different sectors rather than assuming that best practice is universal. Online resources include a lecturer guide with additional seminar activities and discussion topics, powerpoint slides and annotated weblinks for students to enable them to develop an astute, nuanced and critical approach to human resource management.
