This second volume of an Artech House bestseller presents an enhanced approach toward product compliance and safety engineering. Written by experts in the field, this new volume presents practical material useful for novice and advanced practitioners. Safety aspects of product approvals, energy management, environmental concerns, material science, radiation, hazardous location, and global market access are explored. Practical features related to global market access are presented, including specific documentation and local labeling requirements, as well as language used for safety instructions and user manuals. Compliance and safety aspects of specific applications such as information technology equipment, audio/video, multimedia, medical, household alarms, systems, luminaires (including LED lamps and lamp control), industrial machinery, and semiconductor manufacturing are discussed. Environmental attributes including temperature, atmospheric pressure, relative humidity, vibration, shock, and packaging/transportation and how they affect product safety are analyzed. Information about testing, environmental HALT and HASS is also provided, focusing on the compliance of electrical products with dedicated environmental regulation. Similarities and differences between ATEX and IECEx are defined. Materials including metal, corrosion, adhesives, insulation, materials, and information about safety of hazardous materials are examined.
