College Study Hacks: 101 Ways to Study Easier and Faster Melanie Falconer, 2017 The general rule of thumb has been that you should study about two to three hours for every hour you spend in the classroom. If you have a 15 credit hour semester you generally spend about 15 hours in class every week which means you should be studying between 30 to 45 hours per week. That's a lot of time many students don't have that kind of time to spare. This book provides college students with 101 study tips that will help them cut down on study time. Our guide offers tips and tricks to be proficient while still absorbing the information needed to succeed. Students will learn how to take the best notes, time management skills, and the low down on sleep, caffeine, and food. You'll learn how to write better papers, how to take tests more efficiently, and how to be a better reader. If you're struggling with studying techniques that take up your time and energy, look no further. This comprehensive guide is your key to getting the grade with the least amount of effort.
