

Cisco Wireless Solution ROI Calculator

This guide offers an overview on the ROI calculator created to measure the business value of implementing Cisco Wireless solutions.

Overview

Cisco commissioned Forrester Consulting to create an ROI calculator that provides an estimate of the potential return on investment customers may realize by deploying a Cisco Unified Wireless Network and related solutions. The tool is designed to allow maximum flexibility for users to customize the most appropriate solution for their wireless implementation. More specifically, users can calculate the return from an investment on a core wireless infrastructure or model how incremental investments in Wireless Video Surveillance or Voice over Wi-Fi solutions would impact ROI. The tool allows users to navigate back and forth and adjust the inputs and change selections to determine the return on investment related to their company. The "reset" functionality allows users to automatically reset the content to the original default settings.

Privacy notice: This tool does not collect or store any personal information and all values can be reset to default.

Methodology

To create this model, Forrester analysts who specialize in mobility services and financial analysis collaborated to define and quantify the benefit areas in which companies may realize financial returns from the implementation. The tool integrates financial modeling techniques to arrive at a risk-adjusted ROI to evaluate the benefits while taking into account the costs associated with the deployment as well as the uncertainty in the costs and benefit estimates. The values delivered by the model are calculated using Forrester's Total Economic Impact (TEI) methodology, which includes elements of cost, benefit, risk, and future flexibility options. To learn more about Forrester's TEI methodology visit, <http://www.forrester.com/TEI> or click on "Model Instructions" on the tool's Home page.

Navigation

When opening the file you are required to enable macros in order to operate the tool. The following information is included in the Define Model Settings page under the Instructions section.

Instructions for Microsoft Excel PC users:

For Excel 2003, if the window below (Figure 1) appears, click on "Enable Macros" and proceed. If you were not prompted or need to check your system security level, follow these instructions:

1. Click "Options" from the "Tools" menu command.
