

CHAPTER 10: MATERIAL TESTING

10.1 Introduction of the Unit of Learning

This unit specifies the competencies required to Conduct Material Testing. It involves preparing for material testing, sampling construction materials, and performing tests on alignment soils, concrete, structural steel, bitumen materials and timber. It also includes documenting test results.

10.2 Performance Standard

Prepare for material testing, sample road construction materials, undertake tests on the alignment soils, perform concrete tests, carry out structural steel tests, perform bitumen tests, and perform timber tests as per the contract documents, project requirements, material testing manual, expertise and qualifications, standard tests and procedures, test procedures and requirements, and SOPs.

10.3 Learning Outcomes

10.3.1 List of Learning Outcomes

- a) Prepare for material testing
- b) Sample road construction materials
- c) Undertake tests on the alignment soils
- d) Perform concrete tests
- e) Carry out structural steel tests
- f) Perform bitumen tests
- g) Perform timber tests

This laboratory manual is designed to acquaint the student with essential civil engineering experimentation works and
various tests to be carried out on and offsite which is required by every civil engineer when he or she enters in a professional
set up This lab manual covers various subjects like Mechanics of Solids in which compressive flexure and tensile strength
testing is done Engineering Geology where geological properties important from civil engineering point of view are studied
Building Material and Concrete Technology lab where testing of material is done Fluid Mechanics lab which is designed to
examine the types and various parameters of fluid flow Applied Hydraulics lab where students study on the models of
hydraulic machinery Surveying lab where students get to know about field surveying like chain and compass survey
Theodolite Survey and Total Station Survey Transportation lab where bitumen and testing of aggregates used for road work
construction is done Geotechnical lab where properties and the strength parameters of the soil are studied Environmental
lab where the quality of water and waste water is checked various tests on solid waste samples are done and noise levels at
various places are checked Each experiment starts with objectives to be achieved the experimental set up and the materials
that are needed to perform the experiment and a stepwise procedure for conducting the experiment and a set of MCQ s at
the end The students will note down their observations measurements and or calculations on the Results Sheets provided at
