The Europeanization of Turkish Public Policies Aylin Güney, Ali Tekin, 2015-09-16 Turkey's candidacy for membership of the European Union has had mixed effects on its public policies The initial degree of cohesion between EU and Turkish national policies practices and institutions has varied by the policy field in question leading to a complex amalgam of fit and misfit between the two actors Their interaction in different policy areas has had direct influence both on Turkey's accession to the EU and its own national reform process With accession negotiations stalled

and Turkey's relationship with the EU increasingly tenuous it is vital to take stock of the extent to which Turkey and the EU are aligned in key policy areas. *The Europeanization of Turkish Public Policies: A Scorecard* is the first comprehensive work focusing on the impact of the EU accession process upon Turkey's public policies between 1999 and 2014. Complementing the authors' earlier volume *Europeanization of Turkey: Policy and Politics*, it brings together leading specialists to provide key analyses of the impact of Europeanization on specific areas of Turkey's public policy. Each chapter applies a core analytical framework to examine a separate policy field, resulting in a consistent and comprehensive volume on Turkey-EU relations. With its focused structure and extensive coverage, concluding with a scorecard enabling informed assessment of the impact of Europeanization on Turkey's public policy areas, this book provides a one-stop resource for scholars and students alike. A timely and informed assessment of the dynamics and outcome of the Europeanization of an EU candidate country's major public policy areas, this book represents an essential resource for those interested in EU-Turkey relations, the effects of Europeanization on Turkey and Turkish politics.

Human Security and Climate Change in Southeast Asia Lorraine M. Elliott, Mely Caballero Anthony, 2013. This book makes an important and timely contribution to debates about the relationship between climate change and security in Southeast Asia. It does so through a human security lens, drawing on local and regional expertise to discuss the threats that climate change poses to human security in Southeast Asia and to show how a human security approach draws attention to the importance of adaptation and strategies for social resilience. In doing so, it exposes the consequences of climate change, the impact on community rights, and access to the special problem of border areas before going on to investigate local and regional strategies for addressing the human security challenges of climate change.

Climate Change, Policy and Security Donald Wallace, Daniel Silander, 2018-04-17. This book examines the multiple strategies proposed by the international community for addressing global climate change (GCC) from both human and state security perspectives. It examines what is needed from major states working within the UN framework to engage with the multiple dimensions of a strategy that addresses GCC and its impacts, where such engagement promotes both human and state security. Two broad frameworks for approaching these issues provide the basis of discussion for the individual chapters, which discuss the strategies being undertaken by major state powers: the US, the EU, China, India, Japan, and Russia. The first framework considers the multiple strategies (mitigation, adaptation, and capacity building) required of the international community to address the effects of GCC. The second framework considers the differentiation of GCC policies in terms of security and how the efficacy of these strategies could be impacted by whether priority is given to state security over human security concerns. This book will be of much interest to students of human security, climate change, foreign policy, and

International Relations **Routledge Handbook of Climate Change and Society** Constance Lever-Tracy, 2010-07-12 As the time scales of natural change accelerate and converge with those of society Routledge Handbook of Climate Change and Society takes the reader into largely uncharted territory in its exploration of anthropogenic climate change Current material is used to highlight the global impact of this issue and the necessity for multidisciplinary and global social science research and teaching to address the problem The book is multidisciplinary and worldwide in scope with contributors spanning specialisms including agro forestry economics environmentalism ethics human geography international relations law politics psychology sociology and theology Their global knowledge is reflected in the content of the text which encompasses chapters on American European and Chinese policies case studies of responses to disasters and of the new technological and lifestyle alternatives that are being adopted and the negotiations leading up to the Copenhagen conference alongside a preface assessing its outcomes Starting with an initial analysis by a leading climatologist key issues discussed in the text include recent findings of natural scientists social causation and vulnerability media and public recognition or scepticism and the merits and difficulties of actions seeking to mitigate and adapt This accessible volume utilizes a wealth of case studies explains technical terms and minimises the use of acronyms associated with the subject making it an essential text for advanced undergraduates postgraduate students and researchers in the social sciences **Poverty and Sustainable**

Development in Asia Armin Bauer, Myo Thant, 2015-01-01 This joint publication from the Asian Development Bank and the Asian Development Bank Institute features selected papers from the September 2009 conference on the social and environmental impact of the global economic crisis on Asia and the Pacific especially on the poor and vulnerable The publication is designed with the needs of policy makers in mind utilizing field country and thematic background studies to cover a large number of countries and cases This publication suggests that the crisis is an opportunity to rethink the model of development in Asia for growth to become more inclusive and sustainable Issues that need to be more carefully considered include closing the gap of dualistic labor markets building up social protection systems rationalizing social expenditures addressing urban poverty through slum upgrading promoting rural development through food security programs in pro poor growth potential areas and concentrating climate change interventions on generating direct benefits for the environments of the poor **Routledge Handbook of Environmental Displacement and Migration** Robert McLeman, François

Gemenne, 2018-03-09 The last twenty years have seen a rapid increase in scholarly activity and publications dedicated to environmental migration and displacement and the field has now reached a point in terms of profile complexity and sheer volume of reporting that a general review and assessment of existing knowledge and future research priorities is warranted So far such a product does not exist The Routledge Handbook of Environmental Displacement and Migration provides a state of the science review of research on how environmental variability and change influence current and future global migration patterns and in some instances trigger large scale population displacements Drawing together contributions from leading

researchers in the field this compendium will become a go to guide for established and newly interested scholars for government and policymaking entities and for students and their instructors It explains theoretical conceptual and empirical developments that have been made in recent years describes their origins and connections to broader topics including migration research development studies and international public policy and law and highlights emerging areas where new and or additional research and reflection are warranted The structure and the nature of the book allow the reader to quickly find a concise review relevant to conducting research or developing policy on particular topics and to obtain a broad reliable survey of what is presently known about the subject

Corporate Social Responsibility and Sustainable Development in Emerging Economies Roopinder Oberoi,Dhirendra K. Vajpeyi,2015-12-24 Corporate Social Responsibility and Sustainable Development in Emerging Economies is an anthology of seven case studies plus two theoretical chapters in a comparative context It analyzes issues related to the rise of multinational corporations their immense economic and political influence in a globalized world and their social responsibility corporate citizenship Corporate social responsibility is closely examined in terms of meeting the challenges of the widening gap between rich and poor relationships with sovereign states environmental degradation exploitation of natural resources labor practices and human rights issues in societies in which multinational corporations operate Are these corporations exempt from social roles and accountable to only their shareholders the minimalist position propounded by economists such as Milton Friedman or do they also have ethical and social responsibilities to participate in improving the quality of human lives in impoverished societies in Africa Asia and Latin America

Issues of Governance, Security, and Development in Contemporary Africa Mohamed Saliou Camara,Alem Hailu,Sabella O. Abidde,2023-12-15 Governance security and development are three critical components of a dialectical nexus that is both dominant and determinant for any objective and fruitful quest for the understanding of the trajectory of a country a region or in the case of Africa a continent from a colonial past to a neocolonial and meta colonial present and toward a future of strategic optimal independence and self reliance That colonial past and the ensuing neocolonial and meta colonial present have made these critical components and the dialectical nexus that they form particularly challenging for the African continent For this reason Issues of Governance Security and Development in Contemporary Africa offers an in depth interdisciplinary analysis of the challenges that contemporary Africa faces within these critical areas as well as the resources and prospects that the continent possesses and can leverage to overcome the said challenges Using case studies involving a range of countries across the continent Mohamed Saliou Camara Alem Hailu and Sabella O Abidde argue that Africa needs to decolonize the terms of reference that guide its nation building statecraft and national development agenda in ways that will facilitate the establishment of viable systems of governance and security and the promotion of genuine development

Post-2020 Climate Change Regime Formation Suh-Yong Chung,2013-07-18 The fate of the climate change regime hangs in the balance as the UN led negotiations try to forge a new international strategy for the post 2020 period Since 1992 the

UNFCCC and its Kyoto Protocol has been the primary legal instrument to respond to the climate challenge. However, the intergovernmental process has been riddled with problems that have rendered it ineffective. The changing economic landscape has further made this country grouping problematic as some developing countries now emit more than some of their advanced counterparts. Such problems have crippled the existing regime in adequately addressing climate change. Building upon the expertise of the contributors of this volume, this ground-breaking collection aims to show the way forward for the intergovernmental process. It is the first of its kind to explore the key features of the regime featuring meticulously researched pieces from leading experts in the field. Each chapter responds to the questions surrounding the political and structural limitations of the current top-down approach taken in climate negotiations and proposes various alternatives countries can take to overcome such limitations in the process of building the post-2020 climate change regime. In particular, this collection underscores the concept of low-carbon development and green growth to make the climate change regime more effective.

A Changing Environment for Human Security Linda Sygna, Karen O'Brien, Johanna Wolf, 2013-06-26. Environmental change presents a new context and new opportunities for transformational change. This timely book will inspire new ways of understanding the relationship between environmental change and human security. A Changing Environment for Human Security: Transformative Approaches to Research, Policy, and Action both supports and informs a call for new transformative approaches to research, policy, and action. The chapters in this book include critical analyses, case studies, and reflections on contemporary environmental and social challenges with a strong emphasis on those related to climate change. Human thoughts and actions have contributed to an environment of insecurity manifested as multiple interacting threats that now represent a serious challenge to humanity. Yet humans also have the capacity to collectively transform the economic, political, social, and cultural systems and structures that perpetuate human insecurities. These fresh perspectives on global environmental change from an interdisciplinary group of international experts will inspire readers, whether students, researchers, policy makers, or practitioners, to think differently about environmental issues and sustainability. The contributions show that in a changing environment, human security is not only a possibility but a choice.

Children's Environmental Rights Under International and EU Law Francesca Ippolito, 2022-11-07. This book is dedicated to a topic which has for a long time lacked the attention it deserves within the academic world. It intends to address in a

coherent and comprehensive manner the problem of the environmental rights of the child which are not identical to the ones of adults whose environmental rights have been appraised from a general point of view In the absence of any international law instrument explicitly granting a child the right to a clean environment drawing on an extensive and original analysis of the UN Convention on the Rights of the Child and the practice of its monitoring body this book undertakes an assessment of the extent to which these challenges may be overcome through a greater engagement between international law on the rights of the child and international environmental law The result is the first comprehensive study on the manner in which these two mutually reinforcing legal regimes can interact to strengthen the protection of children's environmental human rights at stake in the increased strategic environmental and climate litigations at both the national and international level The book is recommended reading for amongst others policy makers international environmental lawyers and human rights lawyers and practitioners Additionally lecturers students and researchers from a range of disciplines will also gain from seeing how new legal scholarship and intertwined branches of international law contribute to the continual development of the living rights of the human rights conventions Francesca Ippolito is Associate Professor of International Law in the Department of Political and Social Science of the University of Cagliari Italy She holds the Jean Monnet Chair on European Climate of Change REACT for 2021-2024
