The Language Gap David Cassels Johnson, Eric J. Johnson, 2021-07-29 The Language Gap provides an accessible review of the language gap research illuminating what we know and what we do not know about the language development of youth from working and lower socioeconomic classes Written to offer a balanced look at existing literature this text analyzes how language gap research is portrayed in the media and how debatable research findings have been portrayed as common sense facts This text additionally analyzes how language gap research has impacted educational policies and will be the first book length overview addressing this area of rapidly growing interest *Critical Perspectives of the Language Gap* Eric J. Johnson, 2020-04-02 This volume is an orchestrated critique of the notion that individuals from lower socioeconomic status communities have inferior language skills as compared to middle and upper class groups The idea of this so called language gap stems in large part from Hart and Risley's 1995 publication Meaningful Differences in the Everyday Experience of Young American Children Hart and Risley proposed that by age 3 children from more economically affluent households were exposed to approximately 30 million more words than children from low income backgrounds They also claimed that this gap in exposure to words negatively impacts cognitive development and eventual academic achievement The contributing authors in this book contest the original concept of a language gap as well as the recent swell of academic research and public programs that it has produced The chapters interrogate the linguistic academic cultural and social implications of the language gap by providing critical accounts grounded in the scholarly disciplines of sociolinguistics anthropology and education This book was originally published as a special issue of the International Multilingual Research Journal
