Cohesion in English M.A.K. Halliday, Ruqaiya Hasan, 2014-01-14 Cohesion in English is concerned with a relatively neglected part of the linguistic system its resources for text construction the range of meanings that are specifically associated with relating what is being spoken or written to its semantic environment A principal component of these resources is cohesion This book studies the cohesion that arises from semantic relations between sentences Reference from one to the other repetition of word meanings the conjunctive force of but so then and the like are considered Further it describes a method for analysing and coding sentences which is applied to specimen texts *Cohesion in English* Michael Alexander Kirkwood Halliday, 1976

New Research on Cohesion and Coherence in Linguistics Zhang Delu, Liu Rushan, 2021-09-15 The study of text cohesion and coherence has been a topic of heated discussion in Linguistics since the 1990s Western linguists have developed two major theoretical frameworks to describe the relationship between the two concepts one posits that cohesive devices are important means to ensure cohesion the other argues that coherence does not rely on cohesion Yet neither has complete explanatory power over reality nor can they solve real life problems This title proposes a creative concrete and highly operational theoretical model that unites cohesion and coherence using authentic English or Chinese examples The authors clarify the concepts of coherence and expand the scope of the research by focusing on a variety of internal and external factors such as psycho cognitive and socio cultural factors Moreover the authors propose that the new theoretical paradigm can be applied to a range of other disciplines including translation and foreign language teaching This title has been one of the most cited works on cohesion and coherence in China Students and scholars of discourse analysis linguistics and language education will find this an invaluable reference
