Perspectives on Consumer Choice Gordon R. Foxall,2016-10-11 Evaluating the ways in which we construe consumer choice this book examines the psychology methods and realities of the role it plays for today s consumer Confronted by competing brands and products services and e tailed opportunities that are but a click away how does the consumer choose among them to achieve the particular array of goods to suit their lifestyle Consumer researchers often seek to explain consumer choice by attributing it to beliefs desires attitudes and intentions in the absence of any theoretical justification Perspectives on Consumer Choice is the outcome of a research program that employs cognitive explanations in a responsible and disciplined way to genuinely elucidate consumer choice in social scientific terms Employing a reasoned approach to understanding consumption this book builds upon theoretical and empirical research in economic psychology behavioral economics and philosophy as well as marketing and consumer research [Jungian Music Psychotherapy](#) Joel Kroeker,2019-04-26 Music is everywhere in our lives and all analysts are witness to musical symbols arising from their

patient's psyche However there is a common resistance to working directly with musical content Combining a wide range of clinical vignettes with analytic theory Kroecker takes an in depth look at the psychoanalytic process through the lens of musical expression and puts forward an approach to working with musical symbols within analysis which he calls Archetypal Music Psychotherapy AMP Kroecker argues that we have lost our connection to the simple vital immediacy that musical expression offers By distilling music into its basic archetypal elements he illustrates how to rediscover our place in this confrontation with deep psyche and highlights the role of the enigmatic musical psyche for guiding us through our life Innovative and interdisciplinary Kroecker's model for working analytically with musical symbols enables readers to harness the impact of meaningful sound allowing them to view these experiences through the clarifying lens of depth psychology and the wider work of contemporary psychoanalytic theory Jungian Music Psychotherapy is a groundbreaking introduction to the ideas of Archetypal Music Psychotherapy that interweaves theory with clinical examples It is essential reading for Jungian analysts psychotherapists psychoanalysts music therapists academics and students of Jungian and post Jungian studies music studies consciousness studies and those interested in the creative arts

Relevant Acoustic Phonetics of L2 English Ettien Koffi, 2021-04-20

Intelligibility is the ultimate goal of human communication However measuring it objectively remained elusive until the 1940s when physicist Harvey Fletcher pioneered a psychoacoustic methodology for doing so Another physicist von Bekesy demonstrated clinically that Fletcher's theory of Critical Bands was anchored in anatomical and auditory reality Fletcher's and Bekesy's approach to intelligibility has revolutionized contemporary understanding of the processes involved in encoding and decoding speech signals Their insights are applied in this book to account for the intelligibility of the pronunciation of 67 non native speakers from the following language backgrounds 10 Arabic 10 Japanese 10 Korean 10 Mandarin 11 Serbian and Croatian the Slavic Group 6 Somali and 10 Spanish speakers who read the Speech Accent Archive elicitation paragraph Their pronunciation is analyzed instrumentally and compared and contrasted with that of 10 native speakers of General American English GAE who read the same paragraph The data driven intelligibility analyses proposed in this book help answer the following questions Can L2 speakers of English whose native language lacks a segment segments or a suprasegment suprasegments manage to produce it them intelligibly If they cannot what segments or suprasegments do they use to substitute for it them Do the compensatory strategies used interfere with intelligibility The findings reported in this book are based on nearly 12 000 measured speech tokens produced by all the participants This includes some 2 000 vowels more than 500 stop consonants over 3 000 fricatives nearly 1 200 nasals about 1 500 approximants a over 1 200 syllables onsets as many as 800 syllable codas more than 1 600 measurement of F0 pitch and duration measurements of no fewer than 539 disyllabic words These measurements are in keeping with Baken and Orlikoff 2000 3 and in accordance with widely accepted Just Noticeable Difference thresholds and relative functional load calculations provided by Catford 1987

Action Research into Teaching English in Russia's Professional Context Natalia A. Gunina, 2015-10-13

This book is a result of the investigative attempts of linguistics professionals to identify and meet the challenges of developing communicative competence in future engineers economists and other such specialists The unifying feature of all the contributions brought together here is the active involvement of the authors in practical instruction of English for specific professional purposes at the tertiary bachelors and masters programs level in Russia This volume covers a number of relevant areas in this field including new developments in methodology approaches to course and materials design and the contribution of language theory to foreign language teaching in a professional context The unique teaching approach advocated in this book denounces the traditional practice of transferring classical methodology of communicative oriented teaching to language classes for students with a non linguistic or non teaching professional orientation The underlying idea of this volume is that a change in professional context implies a change in language teaching methodology including materials techniques and target competences The ideas and experiences analysed here will appeal to

anyone interested in the current trends in foreign language teaching and learning and particularly to educationalists
