Church In The Forest:

Saint Maurice Church Forest Hills, Pa Saint Maurice Church (Forest Hills, Pa.),1997 **State of the Art in Ethiopian Church Forests and Restoration Options** Mengistie Kindu,Thomas Schneider,Alemayehu Wassie,Mulugeta Lemenih,Demel Teketay,Thomas Knoke,2022-01-12 This book with contributions from leading academics and including reviews and case studies from Ethiopian Church forests provides a valuable reference for advanced students and researchers interested in forest and other natural resource management ecology and ecosystem services as well as restoration options The book addresses various aspects including a general overview of Ethiopian church forests the present role and future challenges of church forests It also discusses their structure and diversity in the context of sustainability and discusses restoration options for surrounding landscapes under consideration of the circumstances of the land and the needs of surrounding communities The intended readership includes natural resource professionals in general as well as forestry professionals in particular practitioners policymakers educators and researchers The book will provide the reader with a good foundation for understanding Ethiopian forest resources and restoration options of degraded landscape *Sanctity and Environment in Ethiopian Hagiography* Abate Gobena,2023-10-04 The original forests of the central and northern highlands of Ethiopia are almost entirely confined to the sacred groves surrounding the churches and monasteries of the Ethiopian Orthodox Tewahido Church In Ethiopian tradition sanctity starts from the Tabot on the altar of the church and extends to the outer periphery of the compound Church forests serve as shade and shelter for the sacred and are seen as integral parts of the churchyard The Act of Gebre Menfes Qiddus GGMQ is an original Ethiopic hagiographic text It depicts the life and struggle of the saint in the wilderness of forests and mountains Hagiographic texts like GGMQ are in Ethiopia not mere historical records but texts linked to the daily liturgical services that shape and mould the perceptions and actions of their readers and listeners The aim of the thesis is to analyse how GGMQ presents the relation between the saint and the natural environment in order to see if there is a correlation with how the Ethiopian tradition has preserved the church forests and has considered these to be sacred spaces representing the wilderness The aim is achieved through a close reading of the text and its intertexts using four selected themes as analytical instruments ascetic estrangement coexistence with non human creation identification with the angels and reconciliation of opposites The analysis and the fact that the GGMQ is one of the most venerated texts read and heard with great liturgical solemnity show that there are good reasons to believe that the constant reading of GGMQ has made and makes a significant impact upon the readers views on the mutual co habitation of human and non human creation and the development of an awareness of the need to preserve the wilderness and non human creation *Alabama Geographic Names Information System* Geological Survey (U.S.). main ways Firstly increases in temperatures are detrimental to a number of organisms especially those in sensitive habitats such as coral reefs and rainforests Secondly the pressures posed by a changing climate may lead to sets of responses in areas as varied as phenology range and physiology of living organisms often leading to changes in their lifecycles especially but not only in reproduction losses in productivity or even death In some cases the very survival of very sensitive species may be endangered Thirdly the impacts of climate change on biodiversity will be felt in the short term with regard to some species and ecosystems but also in the medium and long term in many biomes Indeed if left unchecked some of these impacts may be irreversible Many individual governments financial institutes and international donors are currently spending billions of dollars on projects addressing climate change and biodiversity but with little coordination Quite often the emphasis is on adaptation efforts with little emphasis on the connections between physio ecological changes and the lifecycles and metabolisms of fauna and flora or the influence of poor governance on biodiversity As such there is a recognized need to not only better understand the impacts of climate change on biodiversity but to also identify test and implement measures aimed at managing the many risks that climate change poses to fauna flora and micro organisms In particular the question of how to restore and protect ecosystems from the impact of climate change also has to be urgently addressed This book was written to address this need The respective papers explore matters related to the use of an ecosystem based approach to increase local adaptation capacity consider the significance of a protected areas network in preserving biodiversity in a changing northern European climate and assess the impacts of climate change on specific species including wild terrestrial animals The book also presents a variety of case studies such as the Yellowstone to Yukon Conservation Initiative the effects of climate change on the biodiversity of Aleppo pine forest in Senalba Algeria climate change and biodiversity response in the Niger Delta region and the effects of forest fires on the biodiversity and the soil characteristics of tropical peatlands in Indonesia This is a truly interdisciplinary publication and will benefit all scholars social movements practitioners and members of governmental agencies engaged in research and or executing projects on climate change and biodiversity around the world

The Church Quarterly Review Arthur Cayley Headlam,1891 *Social and Ecological System Dynamics* Krystyna Stave,Goraw Goshu,Shimelis Aynalem,2017-04-06 This book is a social ecological system description and feedback analysis of the Lake Tana Basin the headwater catchment of the Upper Blue Nile River This basin is an important local national and international resource and concern about its sustainable development is growing at many levels Lake Tana Basin outflows of water sediments nutrients and contaminants affect water that flows downstream in the Blue Nile across international boundaries into the Nile River the lake and surrounding land have recently been proposed as a UNESCO Biosphere Reserve the basin has been designated as a key national economic growth corridor in the Ethiopian Growth and Transformation Plan In spite of the Lake Tana Basin s importance there is no comprehensive integrated system wide description of its characteristics and dynamics that can serve as a basis for its sustainable development This book presents

both the social and ecological characteristics of the region and an integrated system wide perspective of the feedback links that shape social and ecological change in the basin Finally it summarizes key research needs for sustainable development

Biodiversity Islands: Strategies for Conservation in Human-Dominated Environments Florencia

Montagnini, 2022-04-22 This book is intended to provide an overview for the identification and establishment of biodiversity islands It presents examples and case studies where the biodiversity islands approach is being used in a variety of locations and contexts worldwide It will contribute to design parameters on appropriate sizing and spatial distribution of biodiversity islands in order to be effective in conservation and regeneration across the landscape using integrated landscape management approaches This book is essential given the current worldwide trend of habitat destruction and the need to preserve biodiversity and its values The chapters are organized in five sections The first section provides the introduction Section 2 3 and 4 discuss the challenges and alternatives of establishment and management case studies across the globe safeguarding of the environmental economic and social benefits and the final section offers a conclusion The contributing authors present views from the academic the practitioner and the policymaker perspectives offering alternatives and suggestions for promoting strategies that support biodiversity conservation through intentionally designed frameworks for sustainable forest landscapes Readers will discover suggestions and concrete examples that can be used by a variety of stakeholders in various settings throughout the world This book is useful to researchers farmers foresters landowners land managers city planners and policy makers alike
