

BASIC ELECTRICAL QUESTIONS AND ANSWERS

- 1. What is the different position of the needle synchroscope? What is the difference between 6 and 12?**

06:00 means that at synchronization. We cannot parallelize the incoming generator. Means 24:00 perfectly Synchronized state (voltage, frequency, and phase sequence identity).

- 2. Why do we close switch 11 and not 12?**

When the synchroscope is about 12 hours, the "slip" between the sine waves is near the minimum (the slip equals Zero when the synchroscope 12) and the difference voltage between the phases minimum synchroscope is 12 Hours). Because of the time it takes to close the switch synchronous, usually it has in 11 hours. Due to the low Delay to close, 11, are nearly 12 hours approach.

- 3. Why is a Megger used for insulation testing and not for a mustimeter?**

With a Megger, a voltage of not less than 500 volts DC is used to test the insulation resistance of the windings. Using a mustimeter, the voltage does not use more than 3 volts DC. Megger test uses a high impedance and is more accurate than a mustimeter.

- 4. What are the MSB guarantees?**

Circuit breakers, fuses and overcurrent relays. The panels are dead front panel, for example, cannot open the Control panel for maintenance, until we turn off the power to the plate by the circuit breaker.

- 5. When the reverse current is flowing?**

The situation of a generator is supplied by a system switching device has a multiplicity of generators that are Parallel to the generator. The current flow, when the system is operating normally, is between the generators of

Engineer Interview Questions and Answers - English Navneet Singh, Here are some common electrical engineer interview questions along with example answers Can you describe your experience with electrical engineering projects Example Answer During my career as an electrical engineer I ve had the opportunity to work on a variety of projects spanning different industries For example in my previous role at XYZ Company I was involved in designing and implementing electrical systems for commercial buildings including power distribution lighting and HVAC control systems I ve also worked on projects involving renewable energy systems such as solar power and wind turbines where I contributed to the design testing and optimization of electrical components Overall my experience has provided me with a strong foundation in electrical engineering principles and practical skills in project management problem solving and collaboration What software tools are you proficient in for electrical engineering design and analysis Example Answer I m proficient in a variety of software tools commonly used in electrical engineering design and analysis This includes CAD software such as AutoCAD and SolidWorks for creating electrical schematics layouts and 3D models I m also experienced in simulation and analysis tools like MATLAB and Simulink for modelling electrical systems performing circuit analysis and simulating dynamic behaviour Additionally I have experience with specialized software for power system analysis such as ETAP and PSS E which I ve used for designing and analysing power distribution networks conducting load flow studies and assessing system stability How do you approach problem solving in electrical engineering projects Example Answer When faced with a problem in an electrical engineering project my approach is to first thoroughly understand the problem and identify the underlying causes or factors contributing to it I gather relevant information review technical specifications and requirements and consult with colleagues or subject matter experts as needed I then develop a systematic approach to address the problem breaking it down into smaller tasks or components that can be analysed and addressed individually Throughout the problem solving process I prioritize safety reliability and efficiency considering the impact of potential solutions on overall system performance and

functionality I also document my analysis decisions and outcomes to ensure transparency and facilitate future troubleshooting or improvements Can you discuss a challenging electrical engineering project you ve worked on and how you overcame obstacles Example Answer One of the most challenging projects I ve worked on was a large scale industrial automation project aimed at upgrading and modernizing an existing manufacturing facility The project involved integrating new automated equipment and control systems into the existing production lines while minimizing downtime and ensuring seamless operation One of the main obstacles we encountered was compatibility issues between the legacy equipment and the new control systems which led to communication errors and performance issues during testing To overcome this challenge I collaborated closely with the project team to identify the root causes of the compatibility issues and develop solutions to address them This involved modifying the communication protocols updating firmware and software configurations and implementing hardware modifications as needed I conducted thorough testing and validation to verify the effectiveness of the solutions and worked closely with the operations team to ensure a smooth transition to the new systems Despite the challenges we were able to successfully complete the project on schedule and within budget achieving significant improvements in productivity efficiency and reliability for the client This experience taught me the importance of proactive problem solving effective communication and collaboration in overcoming obstacles and delivering successful outcomes in complex engineering projects How do you stay updated with advancements in the field of electrical engineering Example Answer As an electrical engineer I understand the importance of staying updated with advancements in the field to remain competitive and continue delivering high quality work To stay informed I regularly read industry publications journals and technical articles to learn about the latest research findings emerging technologies and best practices in electrical engineering I also participate in professional development activities such as workshops seminars and webinars to expand my knowledge and skills in areas of interest Additionally I m a member of professional organizations like the Institute of Electrical and Electronics Engineers IEEE where I have access to networking opportunities conferences and online resources to stay connected with industry trends and developments
