in our lives for decades and it's taken on a new role since the Covid 19 pandemic closed gyms around the world. Whether it's a yoga class on Zoom or panic buying a Peloton, many of us are trying to find ways to exercise effectively within four walls. Whether you are looking to improve your cardiovascular system, lose weight, gain lean muscle mass, or just stay active in home training, it has a place in your life. And the benefits of staying fit are no secret. Improvements in cardiovascular and respiratory health, better regulation of blood sugar, the potential to reduce or eliminate prescription medications such as for diabetes or blood pressure, weight loss, reduction in cancer risk, and improved musculoskeletal strength are some of the better known. But when you're working out at home, you're responsible for the whole plan. What exercises should you do? How many reps of each? How often should you rest? Are you feeling a cardio workout? An upper body workout? Or do you want to fit in a total body workout instead? For many of us, answering all these questions is an added stress we'd rather avoid right now. And the good news is that's something you can avoid without skipping your workout. We are about to show you an immaculate at-home workout program that takes the guesswork out for you and will give you the whole exercise plan.
