Freud Anthony Storr, 1989 Sigmund Freud 1856-1939 revolutionized the way in which we think about ourselves From its beginnings as a theory of neurosis Freud developed psychoanalysis into a general psychology which became widely accepted as the predominant mode of discussing personality and interpersonal relationships Idea Materia Patrick J. Ricard, 2023-03-22 How is it possible that throughout history several inventors around the world have independently invented the same things at the same time Why does history repeat itself How do birds know how to migrate and how can instinct be explained Idea Materia Can Ideas be Measured by Science offers an intriguing explanation a subatomic field of energy that acts as a reservoir of knowledge and ideas that all species can access Author Patrick J Ricard proposes that this field idea materia crosses the barriers of time and space and allows for individuals to access ideas from the past as well as create new ones that are available for others to access While this theory may seem radical at first Ricard explores how the work of other philosophers and psychologists from Plato to Jung and theorists from Vernadsky to Bohm have hinted at the existence of something like idea materia Ricard then expands on these existing theories of ideas to examine all angles of how we experience life including Can one's identity exist after one's historic lifetime is over How can other species know and experience the objectively real universe Can truth be known given how human knowledge is obtained and organized Covering the fields of epistemology metaphysics linguistics logic particle physics mathematics psychology and religion Idea Materia Can Ideas be Measured by Science is both accessible for those new to these areas of study and thought provoking for those already possessing such a background This is a book that encourages ongoing rumination long after you have finished the last page as you will look at yourself and the world in a new way **Key**

Pojman, 2006. What is our nature? What is this enigma that we call human? Who are we? Since the dawn of human history, people have exhibited wildly contradictory qualities: good and evil, love and hate, strength and weakness, kindness and cruelty, aggressiveness and pacifism, generosity and greed, courage and cowardice. Experiencing a sense of eternity in our hearts but at the same time confined to temporal and spatial constraints, we seek to understand ourselves both individually and as a species. In *Who Are We? Theories of Human Nature*, esteemed author Louis P. Pojman seeks to find answers to these questions by exploring major theories in Western philosophy.

and religion along with several traditions in Eastern thought The most comprehensive work of its kind the volume opens with chapters on the Hebrew Christian view of human nature and the contrasting classical Greek theories outlining a dichotomy between faith and reason that loosely frames the rest of the book The following chapters cover the medieval view Hindu and Buddhist perspectives conservative and liberal theories Kant s Copernican revolution Schopenhauer s pessimistic idealism and Karl Marx s theory Freud s psychoanalytic view the existentialist perspective the Darwinian view and scientific materialism are also discussed Pojman concludes with a discussion of the question of free will ultimately asserting that each one of us must decide for ourselves who and what we are and based on that answer how we shall live **American Book**
