process for refining the metal in 1886 it was far from self evident that the new technology would be a business success
Problems involving the technology had to be solved Capital and a labour force were needed The most pressing
entrepreneurial dilemma was the need to develop markets for what was then a novelty product George David Smith examines

of the most successful monopolies in American history By World War II no other American corporation had developed its
industry s markets more dramatically and then dominated them more completely The book then analyzes the undoing of
Alcoa s monopoly by war and antitrust and examines how the firm adapted to evolving forms of oligopolistic and global
