Aces at Kursk Christopher A Lawrence, 2024-07-25 The Battle of Kursk in July 1943 is known for being the largest tank battle in history. A Russian victory, it marked the decisive end of the German offensive capability on the Eastern Front and set the scene for the Soviet successes that followed. While many have focused on the tank engagements, especially the Battle of Prokhorovka, there was an intense air battle going on overhead that was bigger than the Battle of Britain. As part of the German offensive, the Luftwaffe's VIII Air Corps deployed around 1,100 aircraft in the south alone, while the opposing Soviet Second and Seventeenth Air Armies initially deployed over 1,600 aircraft. There was a similar effort surrounding the German attack in the north. The battle in the south began with a Soviet air strike on German airfields and a fight for control of the air that continued throughout the day across the front. On the first day of the battle, 5 July 1943, the Germans flew at least 2,387 sorties in the south, while the two Soviet Air Armies flew 1,688 sorties. That first day of battle resulted in 19 to 27 German planes and 189 Soviet aircraft shot down. This was an aerial engagement like no other ever seen before. Involved on the German side were the 52nd and 3rd Fighter Wings. The 52nd Fighter Wing was the most accomplished fighter wing in history, and many of its top aces were involved in the combats over the Kursk battlefield. These included Walter Krupinski (197 claimed kills in the war), Günther Rall (the third highest scoring ace in history, 275 claimed kills), and the highest scoring ace in history, Erich Hartmann (352 claimed kills). Opposing them were what were to become three of the top five Soviet aces: Kirill Yevstigneyev (53 claimed kills), Nikolai Gulayev (55 claimed kills), and the top scoring Allied ace of the war, Ivan Kozhedub (62 claimed kills). This was indeed the battle of the aces. But there was also the massive ground attack effort by both sides, including the Junkers Ju 87 Stuka fitted with 37mm anti-tank guns, flown by the man who would become the most decorated soldier of the Third Reich, Hans Ulrich Rudel. The aerial battle involved hundreds of Soviet Sturmoviks or IL 2s, Stalin's armored ground attack plane. The battle featured the famous attack by Luftwaffe Hs 129s and Fw 190s on Soviet armor on 8 July 1943. *Aces at Kursk* is not just a war story but a revealing investigation that analyses the entire air battle that turned the tide of the war on the Eastern Front.

B-24 Liberator Units of the Eighth Air Force Robert F Dorr, 2012-12-20 The B-24 Liberator was built in greater numbers than any other US warplane, yet its combat crews live even today in the shadow of the less plentiful but better known B-17. This is their fully illustrated history. Accounts of the Mighty Eighth in Europe, and indeed many of the books and films that emerged from the greatest air campaign in history, often overlook the B-24, even though it was in action for as long as the Flying Fortress and participated in just as many perilous daylight bombing missions. Featuring photography and illustrations throughout, Robert F Dorr's account of these units is ideal for aviation and World War Two enthusiasts.

Day Fighter Aces of the Luftwaffe Jeremy Dixon, 2023-12-30 The second of two comprehensive directories of all the Luftwaffe's single-seater fighter pilots who were awarded the Knight's Cross during the Second World War. The German fighter pilots of the Second World War are among the undoubted heroes of the conflict; their reputation for

flying skill single minded determination and solitary courage hasn't diminished or been clouded by controversy over the years. Their daring and commitment often displayed when towards the end of the war they were fighting against the odds matches that of any of the other air forces they fought against. This detailed highly illustrated reference book which covers the exploits of the most famous and successful individuals among them shows just how effective and undaunted they were. All the Luftwaffe day fighter pilots who flew single seater aircraft and won the Knight's Cross during the war are featured. The entries give information about their early lives and pre war careers and record how many aircraft they shot down the type of aircraft involved and where and when the combat took place. Included are accounts of particular actions which led to the award of the Knight's Cross and the fate of these remarkable pilots later in the war and in the post war world is described too.

Jeremy Dixon's book will be fascinating reading and reference for anyone who is interested in the aviation history of the Second World War.

The Polish Air Force at War: 1943-1945 Jerzy B. Cynk, 1998. After being overrun during the early Blitzkrieg in September 1939 and later in France in 1940 the Polish Air Force flying British and American made fighters and bombers out of England in their own units made a tremendous contribution to the Allied air victory. The PAF's gallant lonely fight in September 1939 inflicted the first losses on the mighty Luftwaffe and allowed Britain a nine month grace to strengthen her air defenses. Their part in the Battle of Britain became legend and its contribution to the early RAF bomber offensive on Germany was equally great. PAF exploits over Dieppe North Africa and during the invasion of Europe received special commendations from the RAF. This two volume set is the result of years painstaking research of the official RAF and PAF documentation and is fully supported by the Polish Air Force Association. After a brief introduction to the PAF's formative years and to the political background to the war itself the factors shaping PAF operations in Great Britain and to the abandonment by Britain of her most faithful ally are discussed. The book also provides a wealth of information about all PAF squadrons their participation in operations the great variety of aircraft flown by the PAF Hurricanes Spitfires Mustangs Warhawks Mosquitoes Lancasters Wellingtons Bostons Liberators and many others their achievements and disappointments victories and losses. These are supplemented by operational statistics in detailed appendices lists charts maps and over 700 black and white and color photographs and color profiles. Volume 1 covers the origins of Polish aviation the air war against the Luftwaffe during the initial Blitzkrieg the air battles over France and the formation of the Polish squadrons the establishment and development of the PAF squadrons in Britain after the battles in France the Battle of Britain PAF units over Dieppe and North Africa expansion of the PAF and operations in 1941 1943 and PAF bomber squadrons and bomber operations 1940 1943.
