On Consistent Solutions for Strategic Games Fioravante Patrone, 1996 *Compound Simple Games I.* Lloyd S. Shapley, RAND CORP SANTA MONICA CALIF., Rand Corporation, United States. Air Force, 1962 This is an investigation of the solutions of the games that are formed by combining two or more simple games played by separate groups of individuals A simple game is one that is completely specified by its winning coalitions Two forms of combination are studied in detail in this Memorandum the sum in which a coalition wins if it wins in either component and the product in which a coalition wins only if it wins in both components In both cases relationships are established between the solutions of the compound games and those of the components Author

On Consistent Solutions for Strategic Games Fioravante Patrone, Graziano Pieri, Stef H. Tijs, Anna Torre, 1998 Nash equilibria for strategic games were characterized by Peleg and Tijs 1996 as those solutions satisfying the properties of consistency converse consistency and one person rationality There are other solutions like the Nash equilibria which enjoy nice properties and appear to be interesting substitutes for Nash equilibria when their existence cannot be guaranteed They can be characterized using an appropriate substitute of one person rationality More generally we introduce the class of personalized Nash equilibria and we prove that it contains all of the solutions characterized by consistency and converse consistency
