Profiles in Operations Research: Pioneers and Innovators recounts the development of the field of Operations Research (OR), the science of decision making. The book traces the development of OR from its military origins to a mature discipline that is recognized worldwide for its contributions to managerial planning and complex global operations. Over the past six decades, OR analyses have impacted our daily lives when making an airline or hotel reservation, waiting in line at a bank, getting the correctly blended fuel at the gas station, and ensuring that the book you are holding arrived at its destination on time. OR originated in the late 1930s when British scientists from various disciplines joined Royal Air Force officers to determine the most effective way to employ new radar technology for intercepting enemy aircraft. During World War II, similar applied research groups were formed to study, test, and evaluate military operations on both sides of the Atlantic. Their work resulted in great improvements. OR helped the Allies win the war. The scientific field that emerged from these studies was called operational research in the U.K. and operations research in the U.S. Today, OR provides a broad and powerful science to aid decision making. Profiles describes the lives and contributions of 43 OR pioneers and innovators and relates how these individuals, with varying backgrounds and diverse interests, were drawn to the nascent field of OR. The profiles also describe how OR techniques and applications expanded considerably beyond the military context to find new domains in business and industry. In addition to their scientific contributions, these profiles capture the life stories of the individuals interwoven with personal tales, vivid vignettes, family backgrounds, and views of the mission and future of OR. Collectively, the profiles recount the fascinating story of the growth and development of a field enriched by the convergence of different disciplines. The Editors: Arjang A. Assad is Dean of the School of Management, University at Buffalo, State University of New York; Saul I. Gass is Professor Emeritus, Department of Decision Operations, Information Technologies, Smith School of Business, University of Maryland, College Park. From the Reviews: Profiles in Operations Research: Pioneers and Innovators. Book Review by Nigel Cummings, U.K. OR Society's e-journal Inside OR, Sept. 2011. I can thoroughly recommend this book. I found it both enlightening and undeniably gripping, so much so that in fact you may find it difficult to put it down once you have commenced reading it. Arjang A. Assad and Saul I. Gass have created a masterwork which will serve to immortalize the pioneers of OR for many years to come. Thomas Schelling and the Nuclear Age Robert Ayson, 2020-09-23. An illuminating insight into the work of Thomas Schelling, one of the most influential strategic thinkers of the nuclear age. By the time of the Cuban Missile Crisis and the United States' early forays into Vietnam, he had become one of the most distinctive voices in Western strategy. This book shows how Schelling's thinking is much more than a reaction to the tensions of the Cold War. In a demonstration that ideas can be just as significant as superpower politics, Robert Ayson traces the way this Harvard University professor built a unique intellectual framework using a mix of social scientific reasoning from economics to social

theory and psychology As such this volume offers a rare glimpse into the intellectual history which underpins classical thinking on nuclear strategy and arms control thinking which still has an enormous influence in the early twenty first century
