 Secularization* Giacomo Marramao, 2025-03-04 This book offers a genealogical understanding of the condition of our time by  
 reconstructing the complex story of the transition from the cyclical time of the classic era to the linear and infuturant time of  
 the modern world Time is therefore understood not as a simple vector but as a trans political form par excellence which  
 involves the fundamental philosophical and political categories of the modern constellation beginning with the concepts of  
 progress revolution liberation and alternative Arguing that the process of secularization in its broadest sense is dependent on  
 the modern notion of cumulative and irreversible time together with the temporalization of history Power and Secularization  
 constitutes a conceptual history that will appeal to scholars of social and political theory and philosophy with interests in  
 intellectual history and the genealogical method *Troisième et dernière encyclopédie théologique ...* Jacques-Paul

 , 2025-11-27 This book examines key actors and themes in the Euro American esoteric reception history of East Asia It traces  
 how Western occultists and esotericists have engaged with East Asia appropriating textual icons such as the Daodejing and  
 Yijing or figures such as Fuxi Laozi and Confucius into their perennialist cosmos The resulting amalgam of globally  
 negotiated tropes or Occult East Asia has co shaped the imagery and appreciation of East Asia in a range of discourses that  
 extend far beyond alternative religious circles **Shi'ism in the Maghrib and al-Andalus, Volume One** John Andrew  
 Morrow, 2020-11-26 Shi'ism in the Maghrib and al Andalus provides a panoramic view of the Shi'ite presence in North Africa  
 and the Iberian Peninsula This first volume surveys the seminal role played by the Shi'ite Imams their companions and their  
 followers in North Africa and Islamic Spain It highlights the fact that several of the Shi'ite Imams had Berber wives and  
 mothers and studies the settlement of sharifian families in the Western part of the Muslim world It examines the role of the  
 Shi'ite Imams in the Sufi orders of the region and scrutinizes the Berber and Arab Shi'ites in the Maghrib and al Andalus the  
 Shi'ite sects that surfaced there and Shi'ite dynasties that they established The work investigates the Shi'ite revolts that took  
 place in both the Maghrib and al Andalus and provides profiles of the Shi'ite scholars who hailed from there The Maliki Sunni

inquisition and the mystery of the Shi'ite Moriscos are also addressed as are the vestiges of Shi'ism and the current Shi'ite revival in the region. By re-examining, re-assessing and rewriting the religious and political history of the region, Shi'ism in the Maghrib and al Andalus makes a revolutionary contribution to scholarship in the field.

**Dictionnaire de l'histoire universelle de l'Église** Louis François Guérin, 1863      **Revue spirite**, 1891      Les infiltrations maçonniques dans l'Eglise Emmanuel Barbier, 1910      **Polemical Encounters** Olav Hammer, Kocku von Stuckrad, 2007-09-30

In its historical development from late antiquity to the present, western esotericism has repeatedly been the issue of polemical discourse. This volume engages the polemical structures that underlie both the identities within and the controversy about esoteric currents in European history. From Jewish and Christian kabbalah through heretical discourse and interconfessional polemics in early modernity to the legitimization of esoteric identity in modern culture, the 12 chapters, accompanied by an editor's introduction, provide a cornucopia of relevant cases that are interpreted in a framework of polemical discourse and othering. This volume sheds new light on the ultimately polemical structure of western esotericism and thus opens new vistas for further research into esoteric discourse.

*Eranos Jahrbuch*, 1970 Portmann, Ritsema, 2023-09-20      *PLANCHES MACONNIQUES* Alain LEFEBVRE,      **A Natural History of Time** Pascal Richet, 2009-10-15

The quest to pinpoint the age of the Earth is nearly as old as humanity itself. For most of history, people trusted mythology or religion to provide the answer, even though nature abounds with clues to the past of the Earth and the stars. In *A Natural History of Time*, geophysicist Pascal Richet tells the fascinating story of how scientists and philosophers examined those clues and from them built a chronological scale that has made it possible to reconstruct the history of nature itself. Richet begins his story with mythological traditions which were heavily influenced by the seasons and almost uniformly viewed time cyclically. The linear history promulgated by Judaism with its story of creation was an exception, and it was that tradition that drove early Christian attempts to date the Earth. For instance, in 169 CE the bishop of Antioch, for instance, declared that the world had been in existence for 5,698 years and the odd months and days. Until the mid-eighteenth century, such natural timescales derived from biblical chronologies prevailed, but Richet demonstrates with the Scientific Revolution, geological and astronomical evidence for much longer timescales began to accumulate. Fossils and the developing science of geology provided compelling evidence for periods of millions and millions of years, a scale that even scientists had difficulty grasping. By the end of the twentieth century, new tools such as radiometric dating had demonstrated that the solar system is four and a half billion years old and the universe itself about twice that. Though controversial questions remain, the quest for time is a story of ingenuity and determination, and like a geologist, Pascal Richet carefully peels back the strata of that history, giving us a chance to marvel at each layer and truly appreciate how far our knowledge and our planet have come.
