Selected Papers Of Hirotugu Akaike:

Selected Papers of Hirotugu Akaike Emanuel Parzen, Kunio Tanabe, Genshiro Kitagawa, 2012-12-06 The pioneering research of Hirotugu Akaike has an international reputation for profoundly affecting how data and time series are analyzed and modelled and is highly regarded by the statistical and technological communities of Japan and the world His 1974 paper A new look at the statistical model identification IEEE Trans Automatic Control AC 19 716 723 is one of the most frequently cited papers in the area of engineering technology and applied sciences according to a 1981 Citation Classic of the Institute of Scientific Information It introduced the broad scientific community to model identification using the methods of Akaike's criterion AIC The AIC method is cited and applied in almost every area of physical and social science The best way to learn about the seminal ideas of pioneering researchers is to read their original papers This book reprints 29 papers of Akaike's more than 140 papers This book of papers by Akaike is a tribute to his outstanding career and a service to provide students and researchers with access to Akaike's innovative and influential ideas and applications To provide a commentary on the career of Akaike the motivations of his ideas and his many remarkable honors and prizes this book reprints A Conversation with Hirotugu Akaike by David F Findley and Emanuel Parzen published in 1995 in the journal Statistical Science This survey of Akaike's career provides each of us with a role model for how to have an impact on society by stimulating applied researchers to implement new statistical methods

Hypothesis Testing and Model Selection in the Social Sciences

David L. Weakliem, 2016-04-25 Examining the major approaches to hypothesis testing and model selection this book blends statistical theory with recommendations for practice illustrated with real world social science examples It systematically compares classical frequentist and Bayesian approaches showing how they are applied exploring ways to reconcile the differences between them and evaluating key controversies and criticisms The book also addresses the role of hypothesis testing in the evaluation of theories the relationship between hypothesis tests and confidence intervals and the role of prior knowledge in Bayesian estimation and Bayesian hypothesis testing Two easily calculated alternatives to standard hypothesis tests are discussed in depth the Akaike information criterion AIC and Bayesian information criterion BIC The companion website ital.wwn.com/weakliem/materials/ital supplies data and syntax files for the book's examples

Model Selection and Multimodel Inference Kenneth P. Burnham, David R. Anderson, 2007-05-28 A unique and comprehensive text on the philosophy of model based data analysis and strategy for the analysis of empirical data The book introduces information theoretic approaches and focuses critical attention on a priori modeling and the selection of a good approximating model that best represents the inference supported by the data It contains several new approaches to estimating model selection uncertainty and incorporating selection uncertainty into estimates of precision An array of examples is given to illustrate various technical issues The text has been written for biologists and statisticians using models for making inferences from empirical data

Developments in non-antibiotic antimicrobials in the era of

drug-resistant bacteria Ritesh Sevalkar, Ana Oliveira, Hugo Oliveira, 2025-10-22 Antibiotic resistance developed by the microbial population is a major global challenge and is reaching an alarming situation incredibly fast There is an immediate need to look at this more seriously than ever Although significant efforts are being made to develop new antibiotics the issue of resistance to those newly developed is also rapidly increasing Limited progress is made in the development of alternative strategies to tackle drug resistant pathogens The development of such new strategies will not only give us more options to treat drug resistant pathogens but also preserve the effectiveness of antibiotics to treat microbial infections To change the current situation actions are needed to control the spread of drug resistant bacterial infections and to focus on the development of alternatives to antibiotic therapies Several emerging strategies are being developed in recent times like host directed therapies therapeutic antibodies nanoparticle based approaches antimicrobial peptides and bacteriophage therapies This research topic edition will cover a wide area of research ranging from host directed therapies to direct targeting of infectious agents The scope of the research topic will be to publish cutting edge research and developments in the areas Developing host directed therapies Vaccines targeted antibodies Therapy with phage or phage derived proteins Antimicrobial peptides Antisense therapy Other non antibiotic antimicrobial approaches The Research Topic welcomes original research articles reviews and commentaries from experts in the field of non antibiotic antimicrobials with a focus on the above mentioned areas
