array of different theories concepts and results Nevertheless there is no general theory which unifies these varied theories
into a comprehensive one Economics has been split between partial and conflicting representations of the functioning of
market economies We have a collection of separate theories such as the Marxian economics the Keynesian economics the
general equilibrium theory and the neoclassical growth theory These diverse economic theories have co existed but not in a
structured relationship with each other Economic students are trained to understand economic phenomena by severally
incompatible theories one by one in the same course Since the end of Second World War many crises in economic theory have
been announced The economist experienced the crisis of the general equilibrium economics the crisis of the neoclassical
growth economics the crisis of the Keynesian economics not to mention the crises of the Marxian economics It is quite
reasonable to expect the loss of confidence in theoretical economics even among professional economists after so many
crises in a very short period of time But a crisis offers new opportunities for change either for better or for worse The past
crises in theoretical economics may be perceived as a historical opportunity to construct a general economic theory by which
