Sign Language Research Sixty Years Later: Current and Future Perspectives Valentina Cuccio, Erin Wilkinson, Brigitte Garcia, Adam Schembri, Erin Moriarty, Sabina Fontana, 2022-11-14     *The SAGE Deaf Studies Encyclopedia* Genie Gertz, Patrick Boudreault, 2016-01-05 The time has come for a new in depth encyclopedic collection of articles defining the current state of Deaf Studies at an international level and using the critical and intersectional lens encompassing the field The emergence of Deaf Studies programs at colleges and universities and the broadened knowledge of social sciences including but not limited to Deaf History Deaf Culture Signed Languages Deaf Bilingual Education Deaf Art and more have served to expand the activities of research teaching analysis and curriculum development The field has experienced a major shift due to increasing awareness of Deaf Studies research since the mid 1960s The field has been further influenced by the Deaf community's movement resistance activism and politics worldwide as well as the impact of technological advances such as in communications with cell phones computers and other devices A major goal of this new encyclopedia is to shift focus away from the Medical Pathological Model that would view Deaf individuals as needing to be fixed in order to correct hearing and speaking deficiencies for the sole purpose of assimilating into mainstream society By contrast The Deaf Studies Encyclopedia seeks to carve out a new and critical perspective on Deaf Studies with the focus that the Deaf are not a people with a disability to be treated and cured medically but rather are members of a distinct cultural group with a distinct and vibrant community and way of being     Semantic Fields in Sign Languages Ulrike Zeshan, Keiko Sagara, 2016-02-22 Typological studies require a broad range of linguistic data from a variety of countries especially developing nations whose languages are under researched This is especially challenging for investigations of sign languages because there are no existing corpora for most of them and some are completely undocumented To examine three cross linguistically fruitful semantic fields in sign languages from a typological perspective for the first time a detailed questionnaire was generated and distributed worldwide through emails mailing lists websites and the newsletter of the World Federation of the Deaf WFD This resulted in robust data on kinship colour and number in 32 sign languages across the globe 10 of which are revealed in depth within this volume These comprise languages from Europe the Americas and the Asia Pacific region including Indonesian sign language varieties which are rarely studied Like other volumes in this series this book will be illuminative for typologists students of linguistics and deaf studies lecturers researchers interpreters and sign language users who travel internationally     The Oxford Handbook of Language Production Matthew Andrew Goldrick, Victor S. Ferreira, Michele Miozzo, 2014 Featuring contributions from psycholinguists cognitive neuroscientists and linguists this book provides a comprehensive multidisciplinary review of the core aspects of human language processing     **Taboo in Sign Languages** Donna Jo Napoli, Jami Fisher, Gene Mirus, 2023-10-26 Taboo topics in deaf communities include the usual ones found in spoken languages as well as ones particular to deaf experiences both in how deaf people relate to hearing people and how deaf

people interact with other deaf people Attention to these topics can help linguists understand better the consequences of field method choices and lead them to adopt better ones Taboo expressions in American Sign Language are innovative regarding the linguistic structures they play with This creativity is evident across the grammar in non taboo expressions but seems to revel in profane ones When it comes to the syntax however certain types of structures occur in taboo expressions that are all but absent elsewhere showing grammatical possibilities that might have gone unnoticed without attention to taboo Taboo expressions are innovative as well in how they respond to changing culture where lexical items that are incoherent with community sensibilities are corrected

Chinese-English Interpreting and

Intercultural Communication Jim Hlavac, Zhichang Xu, 2020-01-27 Chinese and English are the world's largest languages and the number of interpreter-mediated interactions involving Chinese and English speakers has increased exponentially over the last 30 years. This book presents and describes examples of Chinese-English interpreting across a large number of settings: conference interpreting, diplomatic interpreting, media interpreting, business interpreting, police/legal and court interpreting, and healthcare interpreting. Interpreters working in these fields face not only the challenge of providing optimal interlingual transfer but also need to fully understand the discourse/pragmatic conventions of both Chinese and English speakers. This innovative book provides an overview of established and contemporary frameworks of intercultural communication and applies these to a large sample of Chinese-English interpreted interactions. The authors introduce the Inter-Culturality Framework as a descriptive tool to identify and describe the strategies and footings that interpreters adopt. This book contains findings from detailed data with Chinese-English interpreters as experts not only in interlingual exchange but cross-linguistic and intercultural communication. As such, it is a detailed and authoritative guide for trainees as well as practising Chinese-English interpreters.

**Sign Languages** Diane Brentari, 2010-05-27 What are the unique characteristics of sign languages that make them so fascinating? What have recent researchers discovered about them, and what do these findings tell us about human language more generally? This thematic and geographic overview examines more than forty sign languages from around the world. It begins by investigating how sign languages have survived and been transmitted for generations and then goes on to analyse the common characteristics shared by most sign languages, for example, how the use of the visual system affects grammatical structures. The final section describes the phenomena of language variation and change. Drawing on a wide range of examples, the book explores sign languages both old and young, from British, Italian, Asian, and American to Israeli, Al-Sayyid Bedouin, African, and Nicaraguan. Written in a clear, readable style, it is the essential reference for students and scholars working in sign language studies and deaf studies.
