Because of their capacity for rapid growth the tropical and subtropical regions have a great advantage over the temperate regions William Ladrach has dedicated more than 40 years to the research and management of forest plantations in various parts of the world principally in Central and South America This book Applied Forest Management for Tropical and Subtropical Plantations provides a guide to future forest production It is a guide to applied forestry and covers subjects from viewpoints of the biological ecological economic and industrial sciences This work is of great value to foresters students industrial managers researchers and others who work in equatorial countries It will have a strong and positive impact on the establishment of tree plantations during the coming decades
