Plottegg - Architecture Beyond Inclusion and Identity is Exclusion and Difference from Art Manfred Wolff-Plottegg, 2015-11-27 Plottegg is one of Austria's most high profile avant garde architects. He has been pioneering the use of the computer since the 1980s. However, using the technology purely as an electronic drawing board is not enough for him; programs are intended to generate solutions. The works selected for this publication therefore represent the architect's design concepts and working methods rather than solutions for building projects. The projects are primarily presented in the form of images; descriptions, data and comments have been reduced to the minimum possible. To that extent, this book is also a visual supplement to his essays published up to now. This first monograph on Plottegg's built and planned architecture closes a gap in the documentation of innovative Austrian architects.

Amplifications Paul Carter, 2019-02-21 Written by one of the most prominent thinkers in sound studies, *Amplifications* presents a perspective on sound narrated through the experiences of a sound artist and writer. A work of reflective philosophy, *Amplifications* sits at the intersection of history, creative practice and sound studies, recounting this narrative through a series of themes: rattles, echoes, recordings, etc. Carter offers a unique perspective on migratory poetics, bringing together his own compositions and life's works while using his personal narrative to frame larger theoretical questions about sound and migration.

The Business of Research Deborah Saunt, Tom Greenall, Roberta Marcaccio, 2019-06-17 Architectural research is being redefined in practice. Whereas once the value of a piece of research was solely measured by the number of citations it received by fellow academics, shifting funding models and new societal

concerns are forcing academia to question its structure and this mode of evaluation At the same time a wave of practitioners and new types of institutions such as RMIT in Melbourne and the London School of Architecture LSA have been recasting architectural education and theoretical speculation within practice turning the traditional architectural studio into a learning environment that adopts and adapts academic models and starts to use architectural research as a potential source of business intelligence as a means for self generating future commissions and speculative opportunities that sometimes even shift the terrain of practice This new focus on research in practice is indicative of a profession redefining its relevance and scope This is destabilising the traditional roles of academia and practice by questioning their deep rooted separation and demanding a new definition of the term research with one that is relevant to both parties This issue features contributions from architectural thinkers researchers and a number of practitioners who are recasting academic speculation within their own studios This not only redefines what is meant by research and what forms it takes but also how it creates value for them their clients for the discipline as a whole and for the ultimate users of their designs This helps us to understand how research might be deemed valuable beyond a purely academic context Moreover it raises significant questions in terms of opportunities and risks that arise when research is recast into the less regimented realm of practice Contributors Daniel Davis Lionel Devlieger David Green Harriet Harris Rory Hyde Lara Kinneir James Soane Ziona Strelitz Leon van Schaik John Zhang Featured architects Assemble DSDHA Foster Partners Iredale Pedersen Hook OMA Public Practice and Superflux

The History of Oxford University Press: Volume IV Keith Robbins, 2017-05-19 The story of Oxford University Press spans five centuries of printing and publishing Beginning with the first presses set up in Oxford in the fifteenth century and the later establishment of a university printing house it leads through the publication of bibles scholarly works and the Oxford English Dictionary to a twentieth century expansion that created the largest university press in the world playing a part in research education and language learning in more than 50 countries With access to extensive archives the four volume History of OUP traces the impact of long term changes in printing technology and the business of publishing It also considers the effects of wider trends in education reading and scholarship in international trade and the spreading influence of the English language and in cultural and social history both in Oxford and through its presence around the world In the decades after 1970 Oxford University Press met new challenges but also a period of unprecedented growth In this concluding volume Keith Robbins and 21 expert contributors assess OUP's changing structure its academic mission and its business operations through years of economic turbulence and continuous technological change The Press repositioned itself after 1970 it brought its London Business to Oxford closed its Printing House and rapidly developed new publishing for English language teaching in regions far beyond its traditional markets Yet in an increasingly competitive worldwide industry OUP remained the department of a major British university sharing its commitment to excellence in scholarship and education The resulting opportunities and sometimes tensions are traced here through detailed consideration of OUP's business decisions
