Tsao,2018-11-12 This open access book examines how the social sciences can be integrated into the praxis of engineering and science presenting unique perspectives on the interplay between engineering and social science Motivated by the report by the Commission on Humanities and Social Sciences of the American Association of Arts and Sciences which emphasizes the importance of social sciences and Humanities in technical fields the essays and papers collected in this book were presented at the NSF funded workshop Engineering a Better Future Interplay between

Engineering Social Sciences and Innovation which brought together a singular collection of people topics and disciplines The book is split into three parts A Meeting at the Middle Challenges to educating at the boundaries covers experiments in combining engineering education and the social sciences B Engineers Shaping Human Affairs Investigating the interaction between social sciences and engineering including the cult of innovation politics of engineering engineering design and future of societies and C Engineering the Engineers Investigates thinking about design with papers on the art and science of science and engineering practice

Tech Olivier Alexandre, 2025-09-23 The first holistic analysis of the space mindset and inner workings of Silicon Valley in a generation Sometimes only an outsider can show how an industry works and how that industry works upon the world In Tech sociologist Olivier Alexandre takes us on a revealing tour of Silicon Valley s prominent personalities and vibrant networks to capture the way its denizens live think relate and innovate and how they shape the very code and conduct of business itself Even seasoned observers will gain insight into the industry s singular milieu from Alexandre s piercing eye He spends as much time with Silicon Valley s major players as with those who fight daily to survive within a system engineered for disruption Embedded deep within the community Alexandre accesses rooms shut tight to the public and reports back on the motivations ambitions and radical vision guiding tech companies From the conquest of space to quantum computing engineers have recast the infinitely large and small Some scientists predict the end of death and the replacement of human beings with machines But at what cost Alexandre sees a shadow hanging over the Valley jeopardizing its future and the economy made in its image Critical yet fair Tech illuminates anew a world of perpetual revolution
